

Owairaka Seeds Catalogue December 2024

Name	Description	Regular price
Abutilon vitifolium seeds -(Abutilon, Indian Mallow)	This extremely beautiful member of the mallow family is sought after by gardeners for its clusters of large saucer -shaped soft blue-purple flowers., which are upward facing unlike other abutilons. They can range from the occasional white form through pale to deep purple. The leaves are somewhat like a grape's , five lobed, like grey felt in appearance, dull green to grey above and lighter underneath, and are downy to touch. Flowers tend to be short lived but there is a great profusion produced in the summer months, and where it thrives it brightens up the garden in the summer months.	4.9
Achillea filipendulina 'Parkers Variety' seeds -(Fern Leaf Yarrow)	This achillea has long ferny leaves, which are grey - green and aromatic. The flower heads are large and flat and are composed of tens of small bright yellow flowers, which make extremely good cut flowers. The plants form a vigorous clump and are frost hardy. Achillea filipendulina 'Parkers Variety' won the prestigious Royal Horticultural Award of Garden Merit.	4.9
Achillea millefolium 'Cerise Queen' seeds - (Yarrow)	This plant has rosy red flowers . It is drought tolerant and so makes a great xeriscape plant, and is useful for natural landscaping as well as being an excellent garden plant. Bees and other beneficial insects are attracted to it, and it makes an excellent cut flower and does well in a container. It flowers in the first year from seed about 4 months after germination.	4.9
Achillea millefolium 'Colorado' seeds - (Yarrow)	This mix will give flowers in colours of pink, red, white , apricot, beige, bronze and yellow. It flowers from Spring right through until the first frosts. It will flower four months after sowing. It likes well drained soil which is a little lean, but will adapt to most soils and can tolerate full sun and humid warm summers. It is suited to pots or	4.9

	containers and the flowers dry well. It tends to spread a little , so plan to divide the clumps in Spring or autumn to ensure it stays compact. The foliage is narrow mid green grey in colour and fern like, and forms a compact basal mound. It should be trimmed back to the basal leaves encourage further flowering. It flowers in the first year from seed.	
Achillea millefolium 'Favorite Berries'	This mix is an excellent one for adding highlights to the garden, and is of course a great cut flower. You will get plants with flowers of cerise pink , shades of pink and red, apricot and peach, lavender, and colours in between . It flowers the first year from seed, about 4 months after germination.	4.9
Achillea millefolium 'Proa' seeds	This achillea is an improved form which produces more uniform flower head size and the flowers are a better white than other millefoliums. They have a high quantity of essential oil content. People who use achillea millefolium for medicinal purposes such as treating colds, fevers and to improve digestion and circulation prefer this achillea. It is also used for wildflower plantings where it looks very attractive in groups, and as a cut flower which dries well . It makes an excellent container plant. It flowers in the first year from seed, about 4 months after germination.	4.9
Acmella oleracea f dark leaved seeds - (Bulls eye)	This an attractive small plant for edgings or the front of the border, and for containers. It has small round flowers which are a yellow brown, and each flower has a dark burgundy eye at its centre. Its flowers and leaves contain Spilanthol, an analgesic used medicinally for numbing toothaches.	4.9
Aconitum carmichaelii Arendsii-Group seeds - (Monkshood, Chinese Aconite)	This is considered to be one of the best late summer and autumn flowering plants. It has very attractive tall branching flower stems which bear many beautiful, hooded, dark blue flowers. It has a sturdy habit and can be planted in pots . It has been awarded the Award of Garden Merit by the Royal Horticultural Society. Note : All parts of this plant, including the roots are poisonous	4.9
Agastache rugosa 'Korean Zest' seeds - (Korean Mint)	This plant has a compact bushy habit with aromatic minty liquorice scented foliage. Dark violet blue pointed top flowers are borne on dark stems, making a very handsome border plant , and a tea made from the leaves is said to soothe stomach-ache. It makes a good cut flower.	4.9

<p>Agastache rugosa f. albiflora - (White Anis Hyssop)</p>	<p>This is an easily grown plant whose hooded white flowers are beloved all beneficial insects. It is a good subject for natural landscaping where its aromatic foliage and its flowers which are a magnet to bees , sits easily in a natural garden. It is a plant which requires very low maintenance, and it is used traditionally for scent , tea and medical applications. It does well in a container as it is quite hardy , give it plenty of room. It flowers the first year from seed about 4 months after germination</p>	<p>4.9</p>
<p>Ageratum houstonianum 'Timeless Mixture' seeds - (Floss Flower) (Ageratum, Floss Flower)</p>	<p>This plant mix has pretty fluffy flowers in shades of blue, pink , mauve, burgundy and white (A pale mauve is shown below). The flowers grow on a well branched bushy plant. The flowers are good as a cut flower because they have tall sturdy stems and provide a light airy texture to bouquets. But they are also a valuable plant in the garden, where the mid green, heart shaped foliage with scalloped edges creates a useful foil for the flowers. The flowers are produced throughout the summer, and bees and butterflies are attracted to their light scent. Remove the old flowers to encourage further flowering, and tidy up the plant. The plant likes a position in full sun , with moist well drained soil, though will tolerate partial shade, and doesn't have many pest and disease problems. It grows easily from seed, and can be used in containers as well as in the garden. It flowers in the first year from seed, about 3 months from germination. ger of frost has passed with 50cm spacing.</p>	<p>4.9</p>
<p>Agrostemma githago 'Queen Mix' seeds</p>	<p>This dainty flower comes in a mix of white, pink and lavender. It is a long flowering tall plant which makes an excellent cut flower, and lends an airy grace to a mixed border .</p>	<p>4.90</p>
<p>Alcea ficifolia 'Happy Lights' seeds - (Fig leaved hollyhock)</p>	<p>Happy lights is a beautiful strain. It is a blend of white, pink, purple, red, and yellow blooms. It makes a bushy plant rather than having a single spire like the traditional hollyhocks, and will also flower in the first year from seed if sown early enough (May - September). This is a much more robust form of the common hollyhock native to Siberia. If you have problems with hollyhock rust then try this variety which is much more rust resistant. The plants grow to around 150 to 210cm tall, and produce large, single saucer shaped flowers that are 8 to 12cm wide from November to April. They make excellent cut flowers.</p>	<p>4.9</p>

	<p>It should be cut back after flowering, and prefers a moderately fertile well drained soil.</p> <p>This strain is easy to grow from seed , and is extremely hardy . It likes rich soil and full sun.</p>	
Alcea rugosa seeds	<p>This very pretty hollyhock has large single soft yellow flowers to 90cm tall. It is resistant to Hollyhock rust, and looks dramatic in groups or planted against a fence for support.</p>	4.9
Alchemilla mollis 'Select' seeds	<p>This is an outstanding and easily grown plant for the shady border. It is a very beautiful small foliage plant, whose leaves catch the early morning dew and rain and capture the drops in their cupped leaves keeping them hanging like sparkling diamond drops. This selection has strong stems and very uniform foliage and is bred to be a more upright form of alchemilla. It has large clusters of many tiny chartreuse green flowers which are held above the leaves, in sprays . Both leaves and flowers can be used in flower arrangements. Can be grown in pots.</p>	4.9
Alstroemeria ligtu 'Dandy Candy mix'	<p>This mix has bright colours: red, deep rose and picotee-type white with pink. They have particularly large flowers, which have dark stripes and yellow markings. They make an excellent cut flower lasting for about 2 weeks in the vase, and flower for weeks in the garden.</p>	7.90
Alyogyne huegelii seeds - (Blue Hibiscus)	<p>This South Western Australian native plant grows to a shrub, which is evergreen and has large blue to lilac purple flowers which have a trumpet shape. The flowers are 10cm across, and last for 2 or so days . They are borne against dark green foliage, from new leaf axils, and are borne in summer and late autumn, on the current or last years growth. It grows to max 2.5 m. It grows best in full sun, in well drained soil, which is well watered. Prune the plant after the last flowers in late spring to keep it in good shape.</p>	4.9
Amaranthus caudatus 'Emerald tassels'	<p>This is a green flowering amaranthus , which fits in beautifully in all flower bouquet colours, with its trailing emerald flowers It is a splendid plant for the garden with its lovely architectural weeping form and of course makes an excellent cut flower</p>	4.90
Amaranthus caudatus var. gibbosus 'Dreadlocks' seeds - (Love Lies Bleeding)	<p>This is a handsome plant which has abundant magenta - burgundy blooms which weep in long knotted dreadlocks from the top of the plant down to the ground. If you want a spectacular and eye-catching specimen plant this is it. If you want to add some drama to your garden</p>	4.9

	<p>this is the plant to grow. It is easy to grow from seed, and will flower about 12 weeks after you plant the seed. It grows to about 1 m tall, and will add interest to your late summer / autumn garden when all else is faded and past its best.</p>	
<p>Amaranthus cruentus 'Autumn's Touch seeds - (Amaranth,Tassel Flower)</p>	<p>This beautiful plant has very large spikes of copper flowers tinted with apple green in summer and autumn, which are great for an unusual cut flower. They have stems which have many branches. The seeds ripen and attract groups of little birds such as waxeyes and goldfinches in late autumn.</p>	4.9
<p>Amaranthus cruentus 'Hot Biscuits' seeds</p>	<p>This is an upright amaranthus which has long rich copper seed heads which are excellent when used as a highlight amongst pale flowers in the garden. It makes a very good long lasting cut flower.</p>	4.9
<p>Ammobium alatum seeds - (Winged everlasting)</p>	<p>Ammobium alatum is an attractive perennial plant. It is an Australian native. It has silver toned foliage which offsets the numerous small papery white flowers, which have big golden centres. It is a great flower for the garden flowering over an extended period in summer. \nIt is a useful cut flower adding substance to bouquets. The flowers can also be dried. It is a hardy plant , which likes a sunny spot and can be spectacular en masse. However it is best treated as a annual in cold conditions.</p>	4.9
<p>Anigozanthos manglesii seeds - (Kangaroo Paw)</p>	<p>This kangaroo paw is a well known one , as it is the western Australian floral emblem. It has red and green velvety flowers which are borne on long stems up to 120 cm . They make an excellent cut flower, and will flower in their second year from seed. The plants themselves grow well in sandy and gravelly well drained soils in full sun to part shade, and form clumps of strap - like leaves. They will do well in the garden , provided that they are protected from snails and slugs which love them. They can also be used as pot plants, and look good on a balcony. They are attractive to birds which love their nectar. The plant tolerates light frost only , so if your region gets heavy frost, then grow it as a potted plant so you can move it under shelter.</p>	4.9
<p>Anthriscus sylvestris seeds</p>	<p>This is a short lived perennial English wildflower which grows along roadsides and doesn't mind a bit of neglect. It performs well in mixed borders where its light frothy white flowers mingle well with other plants, and can also be used in partially shaded areas to advantage. It flowers</p>	4.90

	from mid spring through into summer, and can be used in prairie style plantings and wild flower meadows. It attracts all of the beneficial insects . It will self seed if it likes the location.	
Antirrhinum majus 'F1 Rocket Series Bronze (AAS)' seeds - (Snapdragon)	This plant is a very good garden specimen and also an excellent cut flower. It has unusual orange pink bronze coloured flowers, and the series is an AAS (All-American Selections) Winner. The Rocket Series antirrhinums were specifically bred for the ability to withstand heat , and to bloom in summer. In temperate climates they are winter hardy. If you cut the deadheads back on the first blooming , the plant will produce a second blooming.	4.9
Antirrhinum majus 'F1 Rocket Series Orchid' seeds - (Snapdragon)	This plant is a very good garden specimen and also an excellent cut flower. It has pretty Orchid pink flowers, and the series is an AAS (All-American Selections) Winner. The Rocket Series antirrhinums were specifically bred for the ability to withstand heat , and to bloom in summer. In temperate climates they are winter hardy. If you cut the deadheads back on the first blooming , the plant will produce a second blooming.	4.9
Antirrhinum majus 'Rust Resistant Giants Mix' seeds - (Snapdragon)	This antirrhinum strain is better at resisting the antirrhinum rust . It has very large flowers in a wide range of colours, is excellent for cutting and performs well in the garden	4.9
Antirrhinum majus F1 'Chantilly Bronze' seeds - (Snapdragon)	This snapdragon has open faced flowers of an attractive salmon/tangerine colour. It makes an excellent cut flower and performs well in cooler conditions. Its flowers are edible and can be used as a garnish, though the flowers have a floral slightly bitter taste.	4.9
Antirrhinum majus F1 'Chantilly Cream Yellow' seeds - (Snapdragon)	This soft creamy yellow F1 hybrid snapdragon is perfect for additions to floral bouquets adding a soft texture to arrangements, and will tone in with most flower colours.It makes a great garden plant as well. It can be grown in spring autumn and under cover in winter, does well when days are short and temperatures are low. The flowers can be used in food garnishes.	4.9
Apium graveolens 'Chinese Pink' seeds - (Celery)	This is a uniquely coloured celery being a real lollipop pink, which does not lose its colour when cooked unlike many other vegetables. It has a strong and slightly sweet flavour and is probably best eaten young. Plant it quite close together and make new sowings every now and then. They like full sun and rich moist soil.	4.9

<p>Aquilegia atrata seeds</p>	<p>This aquilegia is a lovely free flowering plant which has flowers of the deepest black red on many branching stems up to 60 cm and is a sought after species plant for the summer garden. It blooms in late spring and early summer. It prefers rich soils which have a good deal of humous and full sun or partial shade. It is frost hardy. It will do well in containers also.</p>	<p>4.9</p>
<p>Aquilegia F1-Hybr. caerulea 'Swan Lavender' seeds - (Granny's Bonnet, Columbine , Vermont)</p>	<p>This lovely plant is an excellent garden performer, as well as being a good cut flower. The flower has very large violet outer petals surrounding an inner circle of white on a plant with many stems. It is also known as Vermont , from the state series . It makes an excellent container plant.</p>	<p>7.4</p>
<p>Aquilegia F1-hybr. caerulea 'Swan Pink and Yellow' seeds - (Granny's bonnet, Oregon State)</p>	<p>This lovely plant is the product of many years of hybridisation, and is known for its very large flowers. This plant is a very good garden performer , which produces flowers in abundance, very large pink flowers, with pale yellow centres, which are held above a mound of lacy fern like leaves. It has multiple stems which are uniform and abundant, and makes a good garden cut flower. It blooms in late spring and summer. It likes full sun but will tolerate partial shade.</p>	<p>7.4</p>
<p>Aquilegia F1-hybr. caerulea 'Swan White' seeds - (Alaska, Granny's bonnet, Columbine)</p>	<p>This lovely plant won the prestigious RHS Award of Garden Merit. The State Series (or Swan Series as it is known in North America) is the product of many years of hybridisation, which is known for its very large flowers. This plant is a very good garden performer , which produces flowers in abundance, very large pure white flowers, which are held above a mound of lacy fern like leaves, and appear to float in the evening light. It has multiple stems which are uniform and abundant, and makes a good garden cut flower. It blooms in late spring and summer. It makes an excellent container plant. It likes full sun but will tolerate partial shade.</p>	<p>8.1</p>
<p>Aquilegia x hybrida 'McKana's Giant Mix' seeds - (Granny's Bonnet)</p>	<p>This strain of aquilegia has very large flowers which have lovely combinations of white, pink, blue, yellow, pink, pale-blue, purple and scarlet, with clear coloured outer petals, and cream/white coloured inner petals. It will grow well in shady areas and will grow to about 75 cm tall. It blooms every year reliably, and makes a great show with its lovely , long spurred bi-coloured flowers and makes a good cut flower. It makes an excellent container plant.</p>	<p>4.9</p>
<p>Artemisia absinthium seeds -</p>	<p>Artemisia absinthium is grown chiefly for its silver green-grey foliage</p>	<p>4.9</p>

(Wormwood)	which adds interesting texture to garden plantings . It has a bushy growth habit. It is used for natural landscaping and for xeriscaping and for plantings where low maintenance is required. It is attractive to butterflies and other pollinators. The foliage is highly aromatic when crushed. It is also used as a medicinal plant and tea herb. It makes a good container plant for large pots.	
Artemisia annua 'Sweet Annie' seeds - (Sweet wormwood)	This plant is a lovely fine and fragrant filler for flower bouquets, with its filagree leaves like that of a fern. It can also be used dry for winter dried arrangements. It is an ancient chinese medicinal herb.	4.9
Artemisia lactiflora seeds - (White Mugwort)	This plant has creamy white panicles of sweetly scented tiny white flowers which attract butterflies and bees. It is like a delicate giant white astilbe, which flowers from late summer into late autumn in warmer areas, on slightly curved arching stems. It won an Award of Garden Merit from the RHS in 1993. For those of you who want a plant which will fit well into natural landscaping and perennial borders , this is a good one. Although it prefers moist soils , it tolerates drought well and the green silver backed leaves have an aromatic scent. It is easy to grow, and will tolerate part shade. It makes a good cut flower. Cut back in the autumn.	4.9
Asclepias curassavica 'Silky Gold' seeds	This milkweed has clusters of 10cm golden yellow flowers on long stems . It makes a good cut flower, is showy in the garden and is very attractive to honey bees and butterflies particularly the monarch .	4.90
Asphodeline lutea seeds - (Yellow Candle, Kings Spear)	This plant has handsome spikes of unusual spear shaped , fragrant yellow flowers which rise well above the foliage to create a striking display in the garden. The strap like foliage is a blue green colour, and the flower makes a good cut flower and is attractive to bees and other pollinating insects. It is an evergreen, clumping plant which is tolerant of most soils and can be used in dry places.	4.9
Asphodelus albus seeds - (White Asphodel)	This plant forms clumps of long slender leaves rather like a grass in form, and from these clumps emerge long spikes of white starry flowers delicately veined in brown. From the flowers protrude long whiskery stamens which have orange tips They flower in spring and summer and form handsome spires flowering for a protected period due to the way	4.9

	that the flowers open successively from the bottom of the spike . The plant requires a well drained soil which is not very fertile and can tolerate drought to some extent. It makes an excellent container plant. It makes a good cut flower	
Aster callistephus chinensis 'Giant Ray White' seeds - (Giant Quilled Aster)	Aster 'Giant Ray White' produces extra large peony type flowers in a clear white. The flowers are borne on bushy well-branched plants. It is sought after for its finely pointed petals which create a frilly effect. It makes an excellent cut flower as well as a great display in the garden. It is an annual and as it grows to approx 60cm, it has good, long stems for cutting. It prefers a sunny position, in well drained soil.	4.9
Aster callistephus chinensis 'Tiger Paw Sea Star Mix ' seeds	The flowers on these plants come in a lovely range of colours from whites and creams through pink shades and blues to purples . Each flower is a lovely shape and is a very large size. The flowers are bred for the cut flower market so they are excellent for cutting and last well in a vase , but they are also very lovely massed in the garden, where they perform well and fill those awkward spaces where you just want something to bloom freely for the summer months.	4.9
Aster turbinellus seeds - (Symphotrichum turbellinum , Smooth Violet Prairie Aster)	This easy care plant produces very pretty arching sprays of lavender blue daisy shaped flowers in autumn when there is very little else in the garden. It is a winner of the prestigious Award of garden Merit From The RHS for its garden qualities. It flowers for weeks on a bushy plant, and it is mildew resistant. It works well in mixed borders and attracts beneficial insects, such as birds and butterflies and bees, being a great source of nectar for them. It can also withstand approx -15 dec C and can also be grown in dry areas, being a good plant for areas which are naturally dry. It makes a good specimen plant, to grow in a container. It grows in full sun but will also grow in partial shade.If you pinch the stems back before mid summer you can encourage a bushier plant with more flowers and this will also reduce the plant height. Divide the plant every 3-5 years.	4.9
Astilbe Arendsii hybrid 'Bunter Zauber' seeds	This plant produces violet, red, pink, cream and white flowers in summer on a background of dark green leaves which are serrated and set off the flowers perfectly. The plant forms a clump, with slender flowering panicles. It is a plant which does not mind shade, but must have adequate light to flower. In northern regions of NZ they will be best in moist shady spots	4.9

	<p>which still get adequate light (the south side of your house should be good so long as there is light and the soil doesn't dry out too much). In Southern regions give them more sun but part shade.They need rich moist soil and lots of compost.It makes an excellent container plant. This plant is a good cut flower and makes great dried bouquets.</p>	
Astrantia major seeds - (Great Masterwort)	<p>This plant is both long flowering and long lived. It has very showy star shaped heads from which pink, green or white bracts radiate wafting a sweet scent . Each blossom is an umbel of tiny flowers surrounded by a whorl of papery bracts. It flowers continuously throughout summer and autumn. It prefers part shade and rich moist soil, with cooler night time temperatures in the summer, and is very useful for that shady spot where many other sun lovers will not grow. It is not common in most gardens , but should be better known and cultivated according to many knowledgeable gardeners It is native to Central and Eastern Europe. Astrantia make excellent, long lasting cut flowers.</p>	4.9
Aubrieta x cultorum ' Cascade Mix' seeds - (Rock cress)	<p>This is a mix of 4 different aubrieta. It is a selection of plants of extremely free-flowering habit, producing a cascade of brilliant colours - blue, purple , carmine red, and white. The blue is shown in the picture. It makes an excellent container plant.</p>	4.9
Aubrieta x cultorum 'Pixie Pearls' seeds - (Rock cress)	<p>This little plant packs a power of colour. It forms a low mounding plant which will cascade over rock walls in time and in spring it smothers itself with small white flowers, forming a waterfall of colour over walls (with time) without being invasive. Its small flowers are very attractive to bees and it only grows to about 10cm high. It makes an excellent container plant.</p>	4.9
Aubrieta x cultorum 'Royal Cascade Blue' seeds - (Rock Cress)	<p>This little plant packs a power of colour. It forms a low mounding plant which will cascade over rock walls in time and in spring it smothers itself with small blue flowers, forming a waterfall of colour over walls without being invasive. Its small flowers are very attractive to bees and it only grows to about 10cm high. It makes an excellent container plant.</p>	4.9
Aubrieta x cultorum 'Royal Cascade Purple -Violet ' seeds - (Rock Cress)	<p>This little plant packs a power of colour. It forms a low mounding plant which will cascade over rock walls in time and in spring it smothers itself with purple-violet small flowers, forming a waterfall of colour over walls without being invasive. Its small flowers are very attractive to bees and it</p>	4.9

	only grows to about 10cm high. It makes an excellent container plant, and can be kept in check if you don't want it to cascade by clipping occasionally..	
Aubrieta x cultorum 'Royal Cascade Red' seeds - (Rock cress)	This little plant packs a power of colour. It forms a low mounding plant which will cascade over rock walls in time and in spring it smothers itself with small lie flowers, forming a waterfall of colour over walls without being invasive. Its small flowers are very attractive to bees and it only grows to about 10cm high. It makes an excellent container plant.	4.9
Azorina vidalii - (Campanula vidalii, Azores Bellflower)	This very pretty , somewhat short lived, small plant/shrub has thin leaves on strong stems. The flowers are very attractive waxy pink bells which hang from the stems and are a focal point in the garden when in full flower. It doesn't take much care once established and will grow in shade quite well.	4.9
Baptisia australis 'Caspian Blue' seeds - (False Blue Indigo)	This long lived and trouble free plant bears a myriad of blue pea type flowers, which are somewhat like those of a lupin, and grows to a small bush. It is almost insect free and disease resistant making it a low maintenance plant for the garden. It makes a good container plant. Its flowers are good for cutting and as an additional bonus its seed pods make an attractive accent in floral arrangements. It was historically used for medicinal purposes by the Native American people. It has won the award of garden merit from the Royal Horticultural Society, and was also selected as the plant of the year by the Perennial Plant Association.	5.5
Boltonia asteroides var latisquama 'Nana' (False Chamomile)	This plant is a sturdy perennial which is easily grown from seed and takes little care. It will reward you with charming , showy white to pink to lilac sprays of small starry flowers in mid to late summer , which make excellent cut flowers. It can tolerate a range of soils including moderately dry, but prefers soils which is moderately moist and of medium richness. It can be used in natural landscaping, and as a tall container plant in a large pot, for the back of a paved area, so long as you re-pot it regularly when it outgrows its container.	4.9
Brassica juncea 'Ho-Mi Z Dragon Tongue' seeds - (Mustard : Pungent)	This mustard has bright green leaves with purple veins. It is a great vegetable for stir frying (bigger leaves) , and the small leaves are great for salads having a sweet mellow mustard flavour with not too much heat	4.9

Brassica oleracia 'Dazzling Blue' seeds- (Kale)	This new cavolo nero type kale has a blue-green leaf with handsome pink veins. It stands cold winter temperatures well, grows upright, and has an excellent taste. It can be used in stir fries, steamed , and even used in salads, if sliced quite finely.	4.9
Briza maxima seeds- (Greater Quaking Grass)	This is a very beautiful slender annual grass, which is a very useful addition to the garden and also is a pretty cut flower. It produces pale green papery seed heads which look like tiny paper lanterns which dance and glint in the sun in a light breeze. It is an excellent addition to the garden border to provide interest and movement. If the seed heads are included in a flower arrangement in a dark area, it will catch stray beams of light and reflect them with a shimmering quality like droplets of water. The seed heads dry well and can be used in dried arrangements. It will self sow.	4.9
Calamintha nepeta 'Blue Cloud' seeds - (Blue Cloud Catmint)	This is a very valuable , seemingly perpetual flowering perennial which is very useful for edging borders. It forms mounds of sweetly scented leaves and bears clouds of dainty blue flowers in short sprays. The plant flowers its heart out through summer and into autumn and is very attractive to bees and butterflies. It makes an excellent container plant. It flowers in the first year from seed, about 5 months after germination.	4.9
Calamintha nepeta 'W Cloud' seeds - (White Cloud Catmint)	This is a very valuable , seemingly perpetual flowering perennial which is very useful for edging borders. It forms mounds of sweetly scented leaves and bears clouds of dainty white flowers in short sprays. The plant flowers its heart out through summer and into autumn and is very attractive to bees and butterflies. It makes an excellent container plant. It flowers in the first year from seed, about 5 months after germination.	
Calamintha nepeta 'Marvellette Blue' seeds	This calamintha is never without its purple-blue flowers .It has won the prestigious Flueroselect Perennial Plant of the year from the Perennial plant association. It flowers in its first year when grown from seed, and just continues to get better each year. It is a small plant for the front of the border , and can be used medicinally and for herb tea drinks.	5.90
Calendula officinalis 'Zeolights' seeds - (Pot Marigold)	This calendula is a beautiful double frilly flower. Its face is a delightful lollipop mixture of pink and lemon and the back of the flower is maroon. It will brighten up the dullest garden. It will produce flowers over a long period so long as the seed heads are trimmed. Calendula are easy to grow and don't seem to be bothered by	4.9

	many pests. It makes a very good cut flower, and can also be used to advantage in pots and bedding.	
Camassia leichtlinii Alba seeds	This plant has white which are star-shaped. Can tolerate more moisture than most other bulbous plants. Robust 60cm stems emerge from mounds which are like grass, with many 7cm star shaped white blooms in spring to early summer. This plant will produce a small amount of progeny if it is sited in a wet spring site with at least a half day of sunshine. It occurs in wet to moist meadows and ditches in when in its native situation. It makes an excellent cut flower, which is in its element in rain gardens, at the pond edge, and in the seasonal bog. It likes fertile acidic soil	4.9
Camassia leichtlinii ssp. suksdorfii seeds - (Quamash)	This plant has mostly sky blue flowers which are star-shaped. Can tolerate more moisture than most other bulbous plants. This plant has strong stems with many 7cm star shaped lavender blue blooms in spring to early summer. This plant will produce a small amount of progeny if it is sited in a wet spring site with at least a half day of sunshine. It occurs in wet to moist meadows and ditches in when in its native situation. It makes an excellent cut flower, which is in its element in rain gardens, at the pond edge, and in the seasonal bog. It likes fertile acidic soil, and is very hardy.	4.9
Campanula lactiflora 'Pritchards Variety' seeds - (Milky bellflower Pritchards Variety)	Campanula Pritchards variety has large clustering heads of deep violet blue star shaped flowers on branching stems throughout summer. The medium green leaves are lance shaped and set off the beautiful blooms. These seeds may produce pink, white or pale blue flowers as they are open pollinated. The large clusters of flowers appear from February to May, and the plants grow to about 60 cm with a spread of about 60 cm, and the display is spectacular in the mid border of the garden, with bees and butterflies flocking to them. This is an old cottage garden classic, and has always been appreciated for its stately elegance. Campanula lactiflora likes sun or partial shade, in moist but well drained fertile soil. This will encourage plenty of growth and flowers. It will retain its flower colour best in partial shade, and makes an excellent, no fuss cut flower. It will flower in its first year from seed if	4.9

	planted in early spring.	
Campanula persicifolia 'Telham Beauty' seeds - (Peach-leaf bellflower)	Campanula Telham Beauty is not as common as it once was, which is a pity as it is such a pretty plant. It is one of the old cottage garden favourites. It has up to 8 cm sized extremely beautiful, china blue, bell shaped flowers which face outwards on stems which can be up to 90 cm high. It blooms from spring to the end of summer in conditions that suit it. it forms dense clumps of shiny green leaves, which should be divided every few years to reinvigorate it. It is a well-mannered plant, which thrives in full sun and rich well drained soil. The flowers are very good for cutting and last well.	4.1
Campanula persicifolia 'White Bell' seeds - (Peach Leaf Bell Flower)	This plant is one of the most popular campanulas. It grows slowly into a mound shaped plant. It has pure white, cup-shaped flowers appearing from mid December to January, the large nodding bell shaped flower stalks are held above glossy mounds of attractive, emerald green, strap-like foliage to 75cm. The flowers are good for cutting. It likes moist but well drained soil, and a full sun aspect for at least 6 hours per day. Can tolerate some shade. It is native to the mountains of Europe and Asia.	4.9
Camaranthus Roseus 'Heatwave Mix'mseeds- (Vinca, Madagascar periwinkle)	This is a hardy summer annual with very glossy green leaves. It has large flowers in reds, pinks, mauves and white. It makes an excellent container plant and also looks very pretty in garden beds. It flowers throughout the summer and will tolerate hot dry situations .It forms a bushy , dwarf mound of colourful flowers which can be used as a ground cover if plants are placed close together. Plants tolerate heat very well, if kept watered.	4.90
Celosia cristata 'Crystal beauty' seeds – (Crested coxcomb)	This celosia has peach and sherry flowers which appear to shine in the sunlight . The flowers are approx 10cm and are borne on well branched , sturdy stems up to about a metre long. They are excellent for cutting, lasting well in the vase , and make a great show in the garden.	4.90
Celosia argentea cristata 'Temple Bells' - (Cockscomb)	This seed produces a stout bushy plant to approx 100cm which is well rounded and nicely branched. It is an extremely good cut flower and the seed produces flowering plants in a nice range of colours. The flowers are 10-20 cm across, and are equally good as a garden subject or as a	4.9

	cut flower.	
Celosia argentea var cristata 'Sylphid' seeds	The flowers of this plant are used as a bouquet filler, because it produces flowers which complement almost every colour scheme. It has lemony-lime coloured tall, straight stemmed feathery flower plumes which are about 80cm high.	5.6
Celosia argentea var plumosa 'Pampas Plume Mix' seeds	These flowers are grown for their wispy, slightly-pampas-grass like plumes , which make excellent cut flowers, and can be cut again and again. They are very vigorous plants which produce flowers in abundance. They love hot dry conditions, so the northern summer if it continues as it did last year ,will be great for them,as will the southern areas which have long dry hot summers, and they will bloom all summer for you. This mix includes pale lemon, apricot, cream, cranberry and soft orange .	4.9
Celosia cristata 'Chief Mix' -(Crested Coxcomb) seeds	These plants have 60 cm stems with 15 cm velvety flowers shaped a little like cauliflowers. This range was selected for the cut flower market , but they are spectacular in the garden as well. There is a mix of rich colours: Carmine, Fire, Gold, Persimmon, Red, and Rose. Flowers last for 3 weeks in a vase.	4.9
Celosia spicata 'Flamingo Feathers Purple and Pink mix' seeds	This celosia has pointed flowers. They are like paintbrushes and look great in flower arrangements, making an excellent cut flower. The packets may contain purple or pink or a mix of both colours. The purple one is pictured. The plants like warm temperatures, are surprisingly hardy in dry conditions and branch well. They smother themselves in flowers in summer. The foliage on this plant has a reddish-purple hue. It is an excellent cut and dried flower, and is good for the back of the border.	4.9
Celosia spicata 'Flamingo Feathers Purple' seeds	This celosia has bright purple pointed flowers which turn darker as they age. They are like paintbrushes and look great in flower arrangements, making an excellent cut flower. The plants like warm temperatures, are surprisingly hardy in dry conditions and branch well. They smother themselves in flowers in summer.	4.9
Centaurea montana seeds - (Mountain Bluet, Blue Perennial Cornflower)	This plant forms a bushy mound of greyish - green leaves. It is a medium growing plant which likes a sunny position. It bears large showy, deeply fringed, violet blue flowers in early summer. It will bloom again for you in autumn if you cut it back after its first flowering	5.5

	This plant is very hardy, and will grow in most types of soils and climate regions. It may self-seed, so if you don't want them, weed them out as you see them. You can prune the plant back hard in mid-summer to maintain a compact habit. Centaurea Montana makes a good cut flower and a good pot subject.	
Centaurea moschata 'The Bride' seeds - (Sweet Sultan)	This is a lovely old fashioned flower which has been cultivated in cottage gardens for centuries. It has pure white fluffy white flowers which are especially good for picking, but which also look attractive in the garden and work well as a filler between other plants.	4.9
Centaurea pulcherrima seeds - (Batchelor's Button, Star Thistle)	This plant has large rose pink cornflowers above rosettes of silvery deeply indented leaves. It is a tallish grower. It will gradually form a clump, and should be divided every few years to maintain its vigour.	5.5
Centaurea ruthenica seeds - (Russian Knapweed, Star Thistle)	This is a very rare plant from Russia and Romania. It has long straight green 120 cm stems, with prominent dark green, pointed ferny foliage with grey undersides. Its flowers have fluffy thistle-style heads which are a pale citron yellow with very fine crinkled tissue buff-colored bracts. Very few fertile seeds are collected. The plant tolerates some drought, and likes well drained soil in a sunny position. Foliage dies down in winter and reemerges in spring. It is a good plant for the mid to back border of a garden. The flowers are excellent for cutting.	6.3
Cephalaria gigantea seeds - (Giant Pincushion Flower)	This plant is best placed at the back of the border as it grows to approx 1.5metres. However it doesn't take up much room as the flowers and leaves are compact and airy. The flowers are large and resemble scabiosa or pin cushion flowers. They are a pretty creamy light yellow. It makes an excellent cut flower.	6.32
Cerinthe major 'Purple Belle' - (Blue Shrimp Plant, Honeywort)	This is an old fashioned cottage garden flower which has clusters of rich blue-purple tubular nodding flowers. it prefers full sun and well drained moderately fertile soil. It makes an excellent cut flower and works well with other flowers in the garden border	5.4
Chorizema diversifolium seeds - (Climbing Flame Pea)	This Australian native is a small trailing shrub or small climber to about 1 m. Its flowers can be pink red or orange, or a mix of these colours. It flowers in spring and summer. It likes a sandy well drained soil, and likes some shade. It will grow well as a container plant.	4.9
Cirsium Japonica 'Pink	This plant has soft pink petalled flowers which produce flowers on long	4.90

Beauty' seeds	strong stems in its first year if you sow it early enough in the season. It is an excellent cut flower and looks handsome in the garden with its strong thistle like form. The plants are almost completely without thorns	
Cistus albidus 'Pink Silk ' Seeds –(Rock Rose)	This plant has very pretty large ruffled pink flowers with paler pink centres and four black marks . It loves hot locations and will grow to about 90cm high . It is a hardy plant which takes very little care once established	5.90
Clematis integrifolia 'Mongolian Bells' seeds	This is a compact clematis which has large bell shaped flowers in shades of blue, lavender, pink, purple blue and white. It grows in a compact bushy form, and looks good as a small individual plant or can also be used with several plants grown together as a ground cover.	4.9
Clematis macropetala hybrids mixed seeds	This clematis has large, nodding flowers in the colour range of blue to violet and also pink and white. It grows to about 1.5m in height.	4.9
Clematis montana alba seeds	This is a lovely climbing clematis which is faintly perfumed . It grows easily and you will need to have something for it to climb over. It produces a wonderful display of dazzling white flowers in spring, which the butterflies and bees love., and is a joy to see. If you have something which is an eyesore, try growing the clematis over this , and it will transform the object to a thing of beauty.	5.1
Clematis montana pink seeds	This is a lovely climbing clematis which is faintly perfumed . It grows easily and you will need to have something for it to climb over, and plenty of space. It produces a wonderful display of dazzling pink flowers in spring, which the butterflies and bees love., and is a joy to see. If you have something which is an eyesore, try growing the clematis over this , and it will transform the object to a thing of beauty.	5.1
Commelina coelestis - (Sleeping Beauty)	This plant has lovely brilliant blue flowers with bright yellow stamens in early summer and these continue on through summer and into autumn making it a very useful plant for the border. It is easily grown from seed and flowers in the first year.	4.9
Commelina coelestis alba seeds	This plant has pure white flowers with bright yellow stamens. It flowers from early summer through to autumn and makes a valuable plant for the flowering border. It flowers the first year from seed	4.9
Commelina dianthifolia seeds	This plant has brilliant bright blue flowers which are replaced by others	5.2

	each day. It flowers in the first year from seed, continuously from early summer until autumn and makes a well branched plant for borders and containers	
Consolida ajaca 'Splish Splash' seeds – (Larkspur)	This wonderful flower is completely new. It has splashes of dark pink , dark rose, purples and red on a cream to white background. No one flower is exactly the same as its neighbour and each one makes a lovely cut flower	4.90
Consolida ajaca Katy's Picotee' seeds	This lovely larkspur has picotee blue and white flowers. The flower colour is quite variable and sometimes you may get white flowers along with the blue and white, but it is a very attractive flower for your garden which makes an excellent cut flower.	4.90
Consolida ajaca 'Tall Pink" – (Larkspur)	This is an attractive plant which has tall spikes of pink shading into rose flowers. Of course , like all larkspurs, it makes a magnificent cut flower and performs well in the garden as well, with its delphinium-like spires.	4.90
Coreopsis grandiflora 'Heliot' seeds - (Tickseed)	This is an easily grown perennial , which has sunny yellow flowers with brown centres. it flowers in early summer and continues flowering until autumn. Heliot flowers profusely within the first year of planting , about 4 months after germination, and comes back year after year. The single daisy-like blooms measure 4-5 cm in diameter and will be a striking feature of your summer garden, which will often capture the attention of visitors. The compact and uniform habit of Heliot makes it useful for the creation of lovely front of border displays and also containers. ' Heliot' grows vigorously without very much care, and doesn't really mind what kind of soil you put it in so long as the soil has some moisture in it, and the position is sunny.It makes an excellent container plant. Heliot has won the Flueroselect award for garden excellence	4.9
Coreopsis tinctoria 'Roulette' seeds - (Tickseed)	This is a selection of double bicour flowers which has been awarded a flueroselect prize. It has rich, velvety mahogany red petals which have rays of bright yellow streaks. There may be the occasional yellow flower with dark red streaks as well. The flowers look a little like a roulette wheel and hence the plants name. This plant flowers right through the summer regardless of the heat humidity , drought and rainy weather. Butterflies and bees love them.	4.9
Cosmos bipinnatus	The flowers of this cosmos have very large single pure white flowers	4.9

'Cupcakes White' seeds	whose petals which are fused into one fully round single disc which can be up to 12cm across. It is a lovely plant to grow in the border where its fragile flowers float amongst the other plants. it is generally fairly pest free, and low maintenance, and is easy to grow from seed	
Cosmos bipinnatus 'Daydream' seeds	This is one of the new breed of cosmos. Its flowers are the palest pink fading to white . It has a central circle of rose over each petal base around a yellow eye. It is a very pretty plant which stands out well in the garden, and it is an instant eye catcher for visitors.	4.9
Cosmos bipinnatus 'Double Click Rose Bon Bon' seeds	This plant has very pretty rose-lavender fluffy double flowers about 7cm across. It has a long flowering season from summer right through to autumn. It grows to about 90cm tall.	4.90
Cosmos Hinomaru seeds	This cosmos flower has a ruby centre surrounded by a white edge. It makes a pretty garden subject with its 10cm flowers and the plant will produce flowers in 9 weeks from seed. It also makes an excellent cut flower.	4.90
Cosmos bipinnatus 'Lemonade' seeds	This very pretty light-as-air cosmos has flowers with pale yellow petals with a central white halo surrounding a yellow button centre. It is 60 cm tall. It makes a very good cut flower , which fits well with most colour schemes, and also works well in the garden border. It is a compact branching plant which produces flowers throughout summer.	4.9
Cosmos bipinnatus 'Peppermint Twist' seeds	This cosmos has big, bright white petals which are striped and edged with rosy-red and have bright yellow centres. The flowers are borne on 1 metre tall stems throughout summer. This is an easy care beauty that performs well in the garden and makes an attractive bedding plant and cutflower which birds and butterflies love	4.9
Cosmos bipinnatus 'Psyche White' seeds	Cosmos Psyche White has pure white slightly wavy petalled flowers which shine in the sunlight. They are semi-double or single blooms , which make perfect cut flowers and garden plants	4.9
Cosmos bipinnatus 'Snow Puff' seeds	This beautiful cosmos has large fluffy double pure white flowers up to 7 cm across, on a tall plant which has abundant flowers. It flowers from summer through into autumn and makes a great cut flower. It makes a pretty statement in the garden, and will also make a good container subject.	4.9

	It likes full sun in average medium moisture, well drained soils. Don't put into rich fertile soils or fertilise, as it will put all its energy into growing taller and producing more leaves at the expense of flowers and will flop over. Pinch out tips for a bushier plant	
Cosmos bipinnatus 'Xsenia' seeds	This cosmos is a very showy plant, which forms a nice compact bush, has unusual terracotta rose coloured flowers, in many shades, which give a bouquet of the flowers a glowing quality. The flowers are rose at the edges and flower center, with terracotta orange in the mid-petals. As the flower matures, the colour fades to a warm, antique rose, the flower petals are tightly packed and the plant grows in a compact form to approx 65cm.	4.9
Cosmos bipinnatus 'Apricot Lemonade' seeds	This is a very unusually coloured cosmos. Petals start off a soft apricot with pale lavender base and reverse, and then when they mature they become pale yellow. With new and maturing flowers on the same plant the result is a lovely mix of colours on the same plant.	4.9
Cosmos Cupcakes 'Blush' seeds	This cosmos has semi double, double and some single cup shaped blooms whose petals are fused together to form a teacup shaped flower which has edges serrated as if they have been cut with pinking shears. They are the most delicate of pinks, and some are striped with pink and darker pink. They are excellent for floral wedding work.	4.9
Crambe cordifolia -(Giant Kale)	This handsome plant has very large kidney shaped dark green leaves which die down in late summer. Its tiny white fragrant cross shaped flowers are produced in early summer in their hundreds on spreading branches in sprays, and will cover the plant. It is a very beautiful large specimen plant which has deserved its Award of Garden Merit from the Royal Horticultural Society. The sprays make a good cut flower, and the plant can be used to advantage as an unusual specimen plant	6.9
Crambe maritima	This salt tolerant plant grows along the coasts of Britain and Europe. It has large waxy grey green leaves which are loosely serrated, and the leaves themselves can stand alone as an attraction in a border, but it also has clouds of small white to cream flowers in spring which add to its attraction. As an added benefit the stems can be eaten blanched in early spring and it was a favourite of the Victorians who rated it similar to asparagus in	6.9

	taste.	
Craspedia globosa 'Billy Buttons' seeds - (Drumsticks)	This plant, an Australian native, has round bright yellow 2.5-3cm ball like flowers on 70 cm stems. It is prized for its usefulness as a cut flower which has a long vase life and can be dried as well.	4.9
Cynoglossum amabile seeds - (Chinese forget-me-not)	This forget-me-not is a well known cottage garden plant, which is a pretty gap filler. It has brilliant bright blue forget-me-not like flowers on long stems in the height of summer. It is quick and easy to grow and self seeds easily. Deadhead if self seeding is not required. It makes a good cut flower, and will repeat well as long as you cut off the spent flower heads. It will grow in full sun or part shade and will tolerate dry conditions.	4.9
Dahlia variabilis 'Black Beauty' seeds	These plants are short and compact about 35 cm high . They suit containers and the front of the border and small beds. The flowers are very dark velvety red, which appear almost black. They like a warm sunny position, and will flower right through summer and into autumn. It flowers in the first year from seed if sown in early spring under cover. It will take about 3 months from germination to flower.	5.5
Dahlia variabilis 'Giant Hybrids Mix' seeds	This is a selection of large flowered dahlias. There are single semi double and double varieties in many colours.	4.9
Dahlia variabilis 'Pompon Mix' seeds	This dahlia seed mix flowers in the summer and has a lovely range of colours. They have small but perfectly formed flowers which are excellent for cutting , and make a great display in the garden. It will flower in the first year from seed if you plant the seeds under glass in early spring.	4.9
Dahlia variabilis 'Showpiece Double Mix'	These Dahlia seeds are an improved range of decorative Giant dahlias. They produce a high percentage of double flowers in all of the colour ranges from white through yellow , pink purple and red and colours in between these. They make excellent cut flowers	4.9
Daucus carota 'Dara' seeds - (Ornamental carrot)	This is a non-fading or much reduced fading type of Daucus carota. It has pink to burgundy-red flowers throughout the bloom season, and is a much sought after variety as a specialty cutflower and is also a pretty filler in the garden. It has nicely aromatic , ferny carrot foliage, and bees and butterflies love it.	4.9
Dianthus caryophyllus	This is a long stemmed carnation which makes an excellent cut flower,	4.9

<p>'Chabaud Avranchin' seeds - (Carnation)</p>	<p>and dries well also. It is a bicoloured flower with ruffled petals in a combination of red with creamy yellow , and is beautifully scented as a carnation should be. It makes a lovely, scented border plant which will rebloom well for you if you keep it dead headed.</p>	
<p>Dianthus caryophyllus 'Chabaud Mix' seeds - (Carnation)</p>	<p>This is a very beautiful and old heirloom dianthus mix from France, which has the sweet and spicy fragrance of clove. It was designed for gardeners who like cut flowers in particular. It has frilly flowers in a wide range of shades, with long stems and an extremely long vase life. The 5cm double blooms have a small percentage of singles borne above grass-like, gray or blue-green foliage. It blooms late January and February and is best grown as an annual for cut-flower production. If you sow the seeds early enough they will reward you by blooming all summer long.</p>	<p>4.9</p>
<p>Dierama pulcherrima-hybr 'White' seeds - (Angels' Fishing Rod)</p>	<p>These open pollinated seeds are from a plant which has graceful airy arching flower stems and bell shaped pure white flowers which resemble small dainty fishing rods. It is a compact form reaching approx 1.2 metre high when in flower. It is the perfect perennial for the summer garden, and it also looks good in containers. It looks its best when it has room to show off its graceful flowers, and is attractive when planted near water, but the corms must not get too wet over winter, so careful placing is required, once the seeds have grown to corms, if you are planting near water.</p> <p>Dieramas like an open, sunny position in a fertile, loamy, moist, but well-drained, soil, which doesn't dry out in summer or become waterlogged in winter. Heavier clay soils and lighter sandy soils should be improved by incorporating well-rotted organic matter. Alternatively, dieramas do well in raised beds.</p> <p>Dieramas pollinate easily with other species and varieties. This plant may produce seeds which have flowers other than white, although there are no other colours in the garden.</p>	<p>4.9</p>
<p>Dierama dracomontanum seeds - (Angel's Fishing Rod)</p>	<p>This is a dierama not often seen on the market. It has compact clumps of long thin mid green leaves, from which emerge long stems of deep pink flared flowers. The flowers are very large in proportion to the plant, and hang in abundant arches from the long stems. It makes a spectacular specimen plant and is very attractive near water .</p>	<p>5.9</p>

Dierama pulcherrima 'Blackbird' seeds - (Angel's fishing Rod)	This dierama is the darkest of all dieramas. The seedlings produced may vary in colour , with some being lighter shades , but most should be claret purple . The flowers are produced on pendulous stems which resemble fishing rods and hence their common name.	5.5
Dierama pulcherrima 'Spring Dancer' seeds - (Angels fishing rod)	This plant flowers before the other dieramas. It has open flowers of orchid pink and instead of hanging from the stems , like most dieramas , they are upward facing, which makes it an unusual flower for the species Dieramas like an open, sunny position in a fertile, loamy, moist, but well-drained, soil, which doesn't dry out in summer or become waterlogged in winter. Heavier clay soils and lighter sandy soils should be improved by incorporating well-rotted organic matter. Alternatively, dieramas do well in raised beds. Dieramas can be promiscuous, pollinating easily with other species and varieties. These seeds may produce some flower colours differing from the parent plant.	5.7
Digitalis ferruginea 'Gigantea Gelber Herold' seeds	This Digitalis has larger flowers whose yellow colouring is better than the species flower.It forms a tall pyramidal flower spike , which is extremely handsome especially if placed in groups at the back of the border .Butterflies and other beneficial pollinators love it. The flowers are produced profusely and they are long lasting. An excellent landscaping plant	4.9
Digitalis obscura 'Sunset' seeds - (Digitalis Dusky Maid)	This foxglove has attractive beige apricot/red brown flowers, which many people consider to be very like the flower of a penstemon. It is a low growing plant which likes well drained soil and can tolerate partial shade	4.9
Digitalis parviflora seeds - (Milk chocolate foxglove)	This is a very attractive foxglove, which, when out in flower invites comment from almost all who see it. The tall spires of small cylinder shaped chocolate coloured flowers are set off handsomely by the glossy dark green foliage. Digitalis parviflora will flower in its second year from seed.	4.9
Digitalis purpurea 'Apricot' seeds - (Foxglove)	This soft most unusual apricot pink foxglove won the Award of Garden Merit from the Royal Horticultural Society. It has stately spires of flowers which are tubular in form, and lends height and interest to the garden, or in naturalised settings at the edge of woods. It tolerates sun or shade and can be used as a cut flower.	4.9
Digitalis purpurea 'Snow	This is the first pure, snow-white flowering seed strain among foxgloves.	4.9

<p>thimble' seeds</p>	<p>It has absolutely no lavender to purple spots that are so common among other seed strains. It is a large flowering foxglove which makes an excellent cut flower and if you plant it in groups in your garden it will provide spots of accent amongst other coloured flowers. It is very easy to grow and can be sown at anytime of year. It can also be used as an excellent container plant.</p>	
<p>Echinacea angustifolia seeds</p>	<p>This plant has pink daisy flowers which droop from an orange central disk. It is a useful garden plant being drought, heat and humidity tolerant and will also grow in poor soils. It makes an excellent container plant and cut flower and can also be dried if you dry it upright rather than hanging it downwards. Beneficial insects are attracted to its central disk. It is also used for medicinal purposes.</p>	<p>4.9</p>
<p>Echinacea pallida 'Hula Dancer' seeds - (Coneflower)</p>	<p>This Echinacea has dramatically reflexed, very narrow white petals with a pink tinge. It is the only echinacea species with white pollen. It has thin upright unbranching stems. It makes an excellent cut flower and is drought resistant. Butterflies love it. If you plant it in the garden border it will always be admired for its unusual architectural form.</p>	<p>4.9</p>
<p>Echinacea paradoxa 'Paradoxa Yellow' seeds - (Bush's Purple Coneflower, Ozark Coneflower)</p>	<p>Unlike one of its common names, 'Bush's Purple Coneflower', this plant's flowers are not purple. It has wonderful golden yellow flowers which are 10cm across, with dark cone heads, which sit well above the reed-like foliage and provide a dramatic feature in the garden. It is an extremely drought hardy plant, with a long taproot. It is also heat and humidity tolerant. \nIt is best planted in mass to benefit from the showy blooms. \nIt blooms abundantly from early summer to early autumn, making a spectacular display in the garden. Its flowers make extremely good cut flowers, and they can also be dried. \nAn easy care , and rewarding plant for a dryish site and good for natural planting and wildflower gardens, as well as beds and borders. It can also be planted in containers, provided that the container is large enough for the long taproot.</p>	<p>4.9</p>
<p>Echinacea purpurea 'Happy Star' seeds - (Coneflower)</p>	<p>This echinacea has attractive white flowers which are flat like a daisy. It is a tall long lived plant, which is a good cut flower ,ght, heat and humidity tolerant and will also grow in poor soils. It makes an excellent container plant and cut flower and can also be dried if you dry it upright rather than</p>	<p>4.9</p>

	hanging it downwards, and looks great in the garden. It makes a good container plant, provided that the pot has plenty of space.	
Echinops bannaticus 'Star Frost' seeds - (Globe Thistle)	This plant has many round white ball shaped flowers with handsome dark green foliage, underlaid with grey felt which sets off the blooms well. The plant is well branched and is attractive to bees. It is somewhat shorter than other white echinops. It flowers in the first year from seed, about 5 months after germination. It makes a good cut flower and can also be dried for use in dried floral arrangements	5.2
Echium 'Blue Steeple' seeds	Approx 12-24 months after it is sown, this plant produces spectacular spires of approx 3-4 m which have a myriad of small blue flowers , which the bees love. It will set seed if fortune favours the gardener, but the seed is not prolific.	4.7
Echium 'Pink Fountain' seeds - (Tower of jewels)	This is a very sought after cross of Echium pininiana and echium wildpretii, made by Plant World Gardens. The flower spire grows to approx 3-4 m high and is covered with pale pink flowers which act like a beacon for bees and other beneficial insects. These seeds were produced by open pollination, so they may not all be pink flowering, though most will be.	5.2
Echium fastuosum seeds	This echium grows to about 2m tall with flowers. It has pretty light blue to dark purple blue flowers which are very attractive to insects such as bees and butterflies. It is a large shrubby plant , with a nice mounding habit, which lives for many years. It will grow with very little care and is quite hardy . It tolerates drought quite well and likes the soil to be well drained.	5.9
Elsholtzia stauntonii seeds - (Mint Shrub)	This plant is a small bush which belongs to the mint family. Its leaves have a minty scent when crushed. It bears lilac - purple flowers in panicles in autumn, and is drought tolerant, preferring well drained soil which are on the dry side. It makes a good cut flower.	4.9
Erigeron speciosus 'Pink Jewel' seeds - (Fleabane)	This plant is a must have for the perennial flower garden. It is extremely easy to maintain and will perform well for you once it is established. It has bright pink flowers which are produced over a long time during the summer. They are excellent cut flowers, but also produce a great show during the summer in the garden. It makes an excellent container plant. Their foliage is dark green and they form a bushy clump. If you remove the old flowers they will continue flowering for a long time.	4.9

<p>Eryngium giganteum 'Miss Wilmott's Ghost' seeds - (Giant Sea Holly)</p>	<p>This plant is spectacular, with unusual metallic silvery grey leaves, stems and flowers. It has a green cone in the centre of the flower. It shines in the garden, and reaches its peak in late summer, when all else is becoming untidy and faded. The flowers are excellent for cutting, fresh or dried.</p> <p>It has its name from the tale that English plantswoman Ellen Willmott used to secretly scatter seeds of this plant while visiting other peoples' gardens, since she liked the plant so much.</p> <p>In summer it produces large heads of lovely lime-green flowers with blue stamens backed by large and conspicuous bracts, the whole later developing a shining silvery hue.</p> <p>The "giganteum" refers to the flower heads which are large, and not to the plant which usually grows to approx 90 cm high. Prefers full sun in a light well-drained soil. Will tolerate very light shade. Plant into final position while the plant is young. The roots are often several feet long and do not like to be disturbed. Flower stems may be cut back after flowering but the seedheads are attractive and could be left over winter. Cut flowers before fully open if you wish to dry them. Divide in early spring or autumn, be gentle, the plant does not like root disturbance. It will need to be protected from winter wetness, and is drought tolerant once established. Will self-seed.</p>	<p>4.3</p>
<p>Eryngium giganteum 'Silver Ghost' seeds - (Sea Holly)</p>	<p>This plant is spectacular, with eye catching metallic silvery blue leaves, stems and flowers. Its flowers are larger than E. 'Miss Wilmot's Ghost', and more silvery. It has a luminosity in the garden, and reaches its peak in late summer, when all else is becoming a bit faded and boring.</p> <p>It is especially beautiful at night, in the light of the full moon. It was originally discovered in Turkish beech/pine forest. It has metallic silvery-blue leaves, and in summer it produces large heads of lovely lime-green flowers with blue stamens backed by large and conspicuous bracts, the whole later developing a shining silvery hue.</p> <p>The "giganteum" refers to the flower heads which are large, and not to the plant which usually grows to approx 1.2 m high. Prefers full sun in a light well-drained soil. Will tolerate very light shade. Plant into final position while the plant is young. The roots are often several feet long</p>	<p>4.3</p>

	<p>and do not like to be disturbed. Flower stems may be cut back after flowering but the seedheads are attractive and could be left over winter. Cut flowers before fully open if you wish to dry them. Divide in early spring or autumn, be gentle, the plant does not like root disturbance. Protect from winter wetness. Will self-seed.</p> <p>Eryngium Giganteum 'Silver Ghost' has won the RHS Award of Garden</p>	
Erysimum chieri 'Vulcan' seeds - (Wallflower)	<p>This is a very old variety of smaller wallflower plant which has been used of old in garden beds. This plant has lovely dark red velvet flowers with a fragrant wallflower scent which bees and butterflies love. It has a neat compact habit of growth making it perfect for smaller beds and front of border.</p>	4.9
Erysimum cheiri 'Far lady Mix' seeds – (Wallflower)	<p>This is a mix of mostly pastel and bi- colour shades. The plants all have honey scented flower spikes in spring. The stems and spikes are strong . This plant is excellent for knee- high spring borders and for cutflowers for spring posies. As a mass landscape plant it cannot be beaten, and the scent is divine.</p>	4.90
Erysimum 'Ruby Gem' Seeds	<p>This is an old tried and true variety which has produced its velvety ruby red deliciously scented blooms in spring for countless english gardeners over many years. It is a no fuss plant which performs well especially in cooler areas. It is best treated as a biennial, though technically a perennial. It makes a lovely cut flower.</p> <p>These plants grow a good size (approx 40 cm) and will benefit from being supported in some form . A tip is to spread a small piece of wide plastic netting supported on poles ,over them while small and allow them to grow through this.</p> <p>Note : the packet contains an overpack of seeds due to low germination</p>	4.90
Filipendula ulmaria seeds - (Meadowsweet)	<p>This plant likes damp soil and grows well alongside streams and in boggy areas, but will also grow in soil which retains some moisture.</p> <p>I has a long history of use as a medicinal plant stretching back to the druids in Britain and beyond that time.</p> <p>It is mostly grown for its very attractive lime green foliage which fades to gold in the summer sun. However the flowers are also very delicate and graceful , and almost frothy in appearance , and are sweetly scented .</p>	4.90

	Some gardeners remove the flowers so that the foliage will remain luxuriant. The plant will grow in full sun or dappled shade.	
Fritillaria meleagris seeds	This flower likes drained but damp soil in the sun or half shade, but does not like being dried out completely. The leaves are narrow, and grass-like and the flowers are beautiful, square-shouldered bells in pink, mauve and darker purples. They are lightly chequered on the outside . On the inside they are paler in colour, and are splashed with green.	4.90
Fritillaria pudica seeds	This small fritillaria has pretty yellow bell shaped flowers, which grows in dry or well drained soils . It is found in its native habitat in the Western USA. The bulb was used by the native americans as a food source.	6.80
Fritillaria pontica seeds - (Fritillary)	This fritillary has apple green flowers with brown detailing on the tips. It has won the RHS award of garden Merit. It is an easy plant to grow, and is tolerant of light shade. It likes average to well drained soil and forms good sized clumps in the garden.	5.40
Gaillardia aristata 'Monarch large Flowered Mix ' seeds - (Blanket Flower)	This is an excellent mix of red gold and bronze flowered plants. They bloom from early summer to autumn attracting all of the beneficial insects., and flower in their first year from seed. Cut the dead heads for continuous bloom. They are drought resistant once they are well established , and make an excellent cut flower. They can also be used for large scale landscape planting.	4.9
Gaillardia aristata 'Torchlight' seeds - (Blanket Flower)	This plant has large red flowers with a yellow border. The exterior edge of the flower has sharp pointed petal edges and almost could have been cut by pinking shears . It is an excellent plant for natural landscaping, and bees and butterflies love it. When his properly established it is drought tolerant and this makes it useful for xeriscaping. It flowers its heart out for a long period, and smothers itself with blooms. It requires very little care and is an easy plant in the garden, and also performs well in pots. It flowers in the first year from seed, about 4 months after germination.	4.9
Gaura lindheimeri 'The Bride' seeds	This is a lovely plant for adding airiness to the garden , as the delicate branches with their white to pale pink flowers sway in the slightest breeze and the bees absolutely love its flowers. It flowers for almost forever, well at least 5 months which is pretty good value. It flowers in the first year after sowing from seed about 4 months after germination, and is also a good cut flower. It is not too fussy where it will grow so long as the soil is	4.9

	well drained and it can tolerate some drought. For its many virtues it was awarded the RHS award of merit.	
Gentiana triflora var japonica seeds	This gentian bears bright blue to light blue flowers which are bell shaped, in the axils of the strong vertical stems. It prefers a good humus rich soil in semi- shade and looks stunning in the garden . It is an extremely good cut flower , lasting very well in the vase.	4.90
Geranium bohemican 'Orchid Blue' seeds	This very beautiful , short lived Geranium has a lovely violet blue flower which is veined with a darker blue. It is a very attractive plant which forms small mounds of green foliage, and can be used as a ground cover to contribute to suppressing border garden weeds . It flowers the first year from seed if sown early , resists diseases well, and does not need any special care. It makes an excellent container plant.	5.5
Geranium pratense 'Painters Palette' seeds - (Meadow Cranesbill)	This is a very pretty mix of geranium pratense colours.From white to pinks, blue to violet, and white with blue splashes The Geranium pratense plant is a smallish clumping plant to about 50cm which grows in standard soils which are well drained. It makes an excellent container plant. You will get a mix of colours including the striped Geranium 'Splish Splash'.	5.4
Geranium pratense 'Striatum' seeds - (Geranium Splish Splash)	This very attractive geranium has white petals which are often striped, flecked or splashed with lavender-blue making it seem like an artists flower which has been freshly painted. It is a small clump forming geranium which is much more compact than other hardy geraniums and makes a lovely garden border plant. It is a hardy easy care plant which will withstand quite severe frosts. It makes an excellent container plant.	7.2
Geranium sanguineum var striatum seeds 'Vision Light Pink'- (Bloody Cranesbil	This is one of the small bushy mound forming types of geranium. It grows as a mound of fine-textured green foliage. In spring and summer it produces a mass of soft-pink flowers, which have deep pink veins. This geranium will withstand variations in climatic conditions, and for those of us who have humid conditions, it will cope well. It will create a nice bushy clump and serve as a good groundcover. Its leaves often turn a lovely bronzy-red in the autumn. It makes an excellent container plant.	7.8
Gerbera jamesonii 'California Giants Mixed' seeds	These flowers very handsome and make excellent cut flowers. This is a taller growing mix of old fashioned , larger growing plants which can be grown outside, in most places in the North Island. There is a wide range of vibrant colour in this mix from reds and pinks through pastel shades	5.4

	of coral, apricot and primrose to cream . We show a dark rose one in the picture. The flowers are long-lasting . Each flower is 12 cm approx across. The plant grows to approx 60cm, and flowers continuously all summer. It prefers light position and coolish temperatures with temperatures no greater than 20 degrees. It likes well drained soil which does not stay damp, but does not like to become bone dry. In warmer areas of New Zealand it can be grown outside and will come back for you each year. 	
Gerbera jamesonii F1-Hybrid 'T& M Mixed ' seeds	These F1- hybrid gerbera mix seeds make great indoor pot plants, and the large bloomed flowers are produced on strong sturdy stems. They can also be grown outdoors in sheltered warm locations in the north of the NI. This is a mix of double and single petalled flowers. Colour range is : reds dark and scarlet , through to cerise and rose pinks, salmons , yellows through to creams , and white . The gerbera F1 - hybrids grow quickly and make a very good pot plants and are easy to grow from seed. They will take dappled shade as well as their favourite sun. They have large flowers and make excellent cut flowers.	4.90
Goniolimon tartaricum seeds - (German Statice, Limonium)	This plant produces an eye-catching display when in full flower. It produces masses of white or pink frilly flowers all summer long, which appear to be made of paper, they are so delicate. The blooms are extremely good as cut flowers , lasting for over 2 weeks as fresh cut flowers, and they are also used as dried flowers because they hold their colour well especially in winter flower arrangements. The plant forms a low mound with broad green leaves which are a good textural ground cover. The flower stalks appear from the foliage in summer, carrying light gossamer, branched panicles that grow 45cm tall. The panicles produce delicate, miniature tubular silvery-white or pink sprays of flowers with little rose-pink inner petals in mid summer. This plant is easy to grow from seed, is long lived and is very productive each year. It grows best in a well-drained site in full sun.	4.9
Gypsophila pacifica seeds – (Pink Baby's Breath)	This is a pretty plant which has well branched stems with a myriad of tiny pale pink flowers. It makes a good cut flower with tall strong stems, and also is an excellent flower in the garden, adding a misty hazy effect which softens other plantings.	4.90
Gypsophila paniculata fl. pl.	This pretty plant produces clouds of dainty double (50%) or single white	4.9

<p>'Snow Flake' seeds - (Baby's breath)</p>	<p>flowers in summer and autumn, in masses above a neat compact plant with blue green foliage. The flower branches reach 90 cm tall. It is used extensively in wedding bouquets and makes a great cut flower. It can also be dried for winter floral arrangements. It prefers moist well drained soil until established and then is drought tolerant. Trim back after blooming to promote vigorous new foliage. Cut back in the autumn for strong spring growth. it is an easy care plant which is hardy to grow.</p>	
<p>Hardenbergia violacea rosea (Bush Form) - (Coral Pea)</p>	<p>This plant has lovely large tresses of pink pea shaped flowers in abundance in early spring . This is the bush form of H. violacea rosea. It is a less vigorous climbing plant than other forms of hardenbergia , and will form a small upright shrub, rather than a climber or ground cover. It does well in most soils and climates, and can cope with light frosts, and does not overrun its position.</p>	<p>5.2</p>
<p>Helenium autumnale 'Helena Red Shades' seeds - (Autumn Helenium)</p>	<p>This plant is a bright easy care perennial, which brings its bright flowers in the late summer when almost everything else in the garden has long finished, and is becoming tatty as it winds down for the autumn. Helenium "Helena Red Shades" flowers in the first year from seed. On well-branched, upright stems it produces many small round flowers in a rich spectrum of red, copper and brown shades. It is a very good performer in your garden and makes a great cut flower. It flowers in the first year from seed.</p>	<p>4.9</p>
<p>Helenium hoopsii seeds - (Sneezeweed)</p>	<p>This plant has large (up to 8cm) rich yellow or orange, daisy-like blooms with a large central disc. It makes an excellent cut flower. It flowers from February to March on a tall, stately plant. It is best placed in the back of a sunny, moist but well-drained border, and is considered to be the most valuable species in the family. Heleniums are versatile plants that love plenty of sunshine and moist soil. They rarely suffer from pests or diseases.</p>	<p>4.9</p>
<p>Helenium puberulum 'Autumn Lollipop' seeds- (Helen's Flower, Rosilla)</p>	<p>This plant has curious ball shaped heads in brown colours with a small yellow skirt of petals. It makes a decorative plant in the garden and is loved as a cut flower and is also prized for its drying abilities. It makes a good container plant. The flower heads are extremely attractive to bees and butterflies, and goldfinches which love the seed. Plant in full sun to light shade , and in soil which gets regular moisture such as stream seeps , but it will also tolerate some drought.</p>	<p>4.9</p>

Helichrysum bracteatum 'Apricot Peach mix' - (Strawflower)	These plants are tall and well branched, and don't need to be staked. They bear lovely double flowers in soft apricot peach shades which make great fresh cut flowers and they dry well also.	4.9
Helichrysum bracteatum 'Antique white' seeds	These plants are tall and well branched. They bear lovely double clear white flowers which make great fresh cut flowers and they dry well also.	4.90
Helichrysum bracteanthum 'Salmon Rose' seeds - (Strawflower, Bracteantha)	These plants are tall and well branched. They bear lovely double soft salmon rose flowers which make great fresh cut flowers and they dry well also.	4.9
Helichrysum bracteatum 'Lemon Yellow' seeds - (Strawflower, Helichrysum)	These plants are tall and well branched. They bear lovely double soft lemon yellow flowers which make great fresh cut flowers and they dry well also.	4.9
Helichrysum bracteatum 'Fireball' - (Strawflower, Everlasting flower, Paper Daisy)	This wonderful strawflower has large coppery red flowers on strong straight stems. It makes an excellent cut flower and dries well for floral arrangements, keeping its colour well.	4.9
Helichrysum bracteatum 'Scarlet' seeds - (Strawflower, Everlasting Daisy)	These deep red , shiny papery flowers are extremely easy to cultivate. They are tall, and with their strong stems and dark green foliage they make extremely good cut and dried flowers. They last a very long time and keep their colour for a long time when dried.	4.9
Helichrysum bracteatum 'Silvery Rose' seeds - (Strawflower)	These plants are tall and well branched. They bear lovely double pure to creamy white flowers which are tinged with rose at the tops of the petals. The rose colour darkens as the flower matures and opens fully , producing a pretty colour effect of light and shade.	4.9
Helichrysum bracteatum 'Summer Rainbow 'Mixed' seeds - (Strawflower)	This is a mix of cultivated varieties of Helichrysum . The plants range from hot reds and golds through shades of magenta, lavender, pink, and white. The plants are about 75 cm high, and are excellent for cutting and drying, as well as being great value in the garden.	4.9
Helichrysum thianshanicum "Golden Baby' seeds	This plant has downy silvery grey foliage and produces large clusters of bright yellow flowers which are everlasting. Each of the flowers is shaped like a yellow pom pom. It is loved for its great everlasting cut flowers which brighten up the indoors in the winter. It will grow in poor, or moderately fertile well-drained soil in full sun. Protect from winter wet and cold dry winds.	4.90
Heliopsis helianthoides var.	This attractive plant cultivar flowers the first year from seed. It flowers in	4.9

<p>scabra 'Burning Hearts' seeds -(False Sunflower)</p>	<p>mid to late summer when there is not much else around, and has large golden and red daisy like flowers on black stems above a large bushy plant with purple leaves. It is cold hardy and is attractive to butterflies and bees. It likes full sun and it flowers in the autumn of the first year from seed.</p>	
<p>Helipterum roseum 'Pierrot White' seeds - (Strawflower, Paper Daisy, Everlasting Daisy) s</p>	<p>This pretty annual plant has pure white flowers which are like paper , and they have an eye-catching centre which has concentric rings of black and bright yellow. They grow to 50 cm, and are excellent for cutting and drying.</p>	<p>4.9</p>
<p>Helleborus orientalis -Hyb 'Double Ladies Mixed 'seeds</p>	<p>This is a wonderful mix of double flowered plants in shades of whites, yellows, pinks, reds and purples. They make an excellent cut flower, and make a very attractive plant in the garden. Plant them in groups for maximum effect. Note : 6 Seeds in packet</p>	<p>8.90</p>
<p>Hesperis matronalis 'Purple' seeds- (Sweet Rocket, Dames Rocket)</p>	<p>This is the purple form of sweet rocket. These plants are biennial, but will self seed. In the first year, a low mound of green leaves is formed, and then in the following spring they produce lovely upright branching heads of fragrant phlox-like flowers. They make an excellent cut flower , and are attractive to butterflies and beneficial insects.</p>	<p>4.9</p>
<p>Hesperis matronalis 'White' seeds-(Sweet Rocket, Dames Rocket)</p>	<p>This is the white form of sweet rocket. These plants are biennial, but will self seed. n the first year, a low mound of green leaves is formed, and then in the following spring they produce lovely upright branching heads of fragrant phlox-like flowers. They make an excellent cut flower , and are attractive to butterflies and beneficial insects.</p>	<p>4.9</p>
<p>Hovea acutifolia seeds - (Purple Pea Bush)</p>	<p>This is a handsome shrub which grows to about 1.5 m. It has very attractive purple pea shaped flowers on long racemes in late winter and spring . It likes a well drained soil in sun or partial shade, and is tolerant to light frosts . It grows readily from seed.</p>	<p>4.9</p>
<p>Iberis umbellata 'Rose cardinal' – (Candytuft)</p>	<p>This candytuft is a nice little plant for the front of borders where it will bloom its heart out for you if it is placed in full sun. It has rose pink , purple and white flowers , and its fragrance attracts beneficial insects. It can also be used as a non invasive ground cover. It can also be used as</p>	<p>4.90</p>

	a cut flower for small posies, and looks very good in a pot.	
Incarvillea delavayi 'Bees Pink' seeds - (Chinese Trumpet Flower, Hardy Gloxinia)	This plant has very large soft pink flowers which have a yellow throat. They appear before the leaves come in summer. It does well in well drained soil and is drought tolerant as well as being able to stand frost to minus 12 degrees. Incarvillea make good container plants but are also excellent in the garden.	6.5
Inula orientalis grandiflora seeds	This plant is a lovely large flowered plant which forms clumps. It likes moist soil well drained soil in full sun, and does well in cold climates. Its flowers are like daisies, and have narrow petals . It makes a very good cut flower.	4.9
Iris spuria hybrids	This iris has slender leaves and will grow into a clump of attractive grey-green spear shaped foliage. The flowers range from white through blue, purple, red and brown and many colour combinations between . Its flowers are usually held on long stems with several flowers to a stem. It makes an attractive garden subject and is easily maintained. The spuria irises like full sun to partial shade and will grow in well drained soil preferring those which are rich in humus. They are attractive to bees and butterflies.	5.26
Jasione laevis 'Blue light' seeds - (Sheeps Bit Scabious)	This is a rare and unusual perennial which is native to southern Europe. It produces many 4cm sky blue flower heads rather like pom poms on tall stems all summer long. It is easy to grow and makes a very good cut flower. The foliage is low growing and a grey -green. It looks good in the rock garden or front of the border. It grows best in nitrogen rich soils that are sandy and well drained in full sun to light shade. It also can be used to advantage in a container. It flowers in the first year from seed, about 4 -5 months after germination	4.9
Knautia macedonica 'Red Cherries' seeds - (Pincushion Flower, Scabiosa 'Red Knight')	This plant has very bright cerise red pincushion like flowers, which is unusual in border perennials and has a long flowering season. It continues from late spring through autumn and even into early winter. It is one of the very best perennials for borders. It makes a nice neat rounded cushion of leaves and the flowers are held well above the greenery. The flowers are good for cutting. It is an undemanding plant to	4.9

	<p>grow, and will gradually spread to form a good clump. It makes an excellent container plant.</p> <p>It is a very popular plant, and is attractive to beneficial insects including bees and butterflies.</p>	
Lactuca sativa ' Morton's Secret Lettuce Mix 2023' seeds - (Lettuce)	<p>This mix contains many different lettuce types , from our supplier who breeds his own lettuces, and you won't be disappointed. They include lettuces with names like “Buffon,” “Karen’s Fave,” “Fuzz Butt,” and “Twisted,” amongst others, the picture shows a few of them.</p>	4.9
Lagurus ovatus seeds - (Bunny Tails, Hare's Tail)	<p>This is an ornamental grass whose plumes commence as a greenish cream and then mature to a pinky buff brown colour. It is an annual grass , which looks good in border edgings and is especially loved as a cut flower, which dries very well and lasts for longer than other dried grasses.</p>	4.9
Leucanthemum x superbum fl pleno 'Snowdrift' - (Crazy Daisy, Shasta daisy) seeds	<p>This shasta daisy has very finely cut petals which appear like a fringe around a yellow centre. they can be double or semi double and are long lasting. they make a good cut flower, and are indispensable in the summer border, being easy to grow from seed and flowering for a long time. It makes an excellent container plant.</p>	4.9
Libertia chilensis (grandiflora) - (Tukauki, Mikoikoi, New Zealand Satin Flower)	<p>This plant has very beautiful clear white satiny flowers, which appear in spring and early summer. It forms a clump of dark green sword shaped leaves , from which arise the lovely white orchid-like pristine white flowers . It is very hardy, does well in average soil conditions , and also can stand some drought, and cold weather. It also does well on the south side of the house, in the shade of the house so long as it is in a light area , where it will light up the garden as white flowers do in the darker parts of the garden . It has won the RHS award of merit and can also be used as a container plant.</p>	4.9
Ligularia przewalskii seeds	<p>This attractive ligularia likes moist soil, and does well in bog areas. It has handsome dark green leaves which make a very ornamental foliage mound and the small yellow flowers borne in spires on black stems , are like tall yellow candles, which light up the location in which they are growing. It will grow in part shade and on the banks for streams and ponds and is a vigorous plant which needs very little care.</p>	5.2
Lilium martagon var album seeds - (Turks Cap lily)	<p>This is the lovely white form of Lilium martagon. There may also be the occasional pink flowered plant produced from these seeds. It has waxy</p>	4.9

	hanging reflexed white flowers , and is an easy plant for the cool garden, coming up every year and multiplying up over the years to form a nice group.	
Lilium martagon 'Mixed' seeds- (Turk's cap)	These lovely little lilies come in an attractive range of colours :yellow, apricot, pink, wine-red, orange, and white blooms, and there are often purple spotted variations amongst these colours. They do best in well drained humus rich soil and prefer part shade.	7.2
Limonium bellidifolium 'Dazzling Blue ' seeds - (Statice, Limonium Caspium, Spangle)	This plant flowers the first year from seed, about 5 months after germination. It has tall branching panicles of airy small blue flowers which float above a mound of large flat leaves. Like all limoniums the flowers are great for cutting and drying. Deadhead to prolong the flowering display. It fits in well with other border plants and lends a lightness to the flower display. It likes full sun and ordinary soil which is on the dry side and well drained It is hardy and requires very little maintenance. Plants which are already growing well can be divided in spring. It makes an excellent container plant.	4.9
Limonium bellidifolium 'Caspia Sea Mist' - (Statice, Sea lavender)	This plant has lovely light airy panicles of tiny blue flowers surrounded by more prominent white calices up to 90cm. It makes an excellent cut flower, as a light frothy filler for bouquets, but is a very good garden plant as well. It flowers in its first year from seed, about 5 months from germination, and will eventually form a round green-grey leaved clump.	4.9
Limonium gmelinii ssp hungaricum seeds - (Perennial Statice)	This plant has tall arching sprays of lilac-blue flowers which are excellent as a cut flower. It blooms over the summer months, and likes a well drained, even sandy soil in full sun. The plant forms a small rosette of green leaves, which is a neat tidy mound, from which the flower stems emerge. It can tolerate drought well and is a useful pretty plant for the garden	4.9
Limonium latifolium seeds - (Sea Lavender)	Limonium latifolium is a very popular plant . It has a large profusion of dainty lavender- blue flowers which are held in panicles in mid to late summer. Plants will produce a number of stems, and the overall effect is billowing and delicate. The flowers are attractive to butterfliesThe foliage is borne in a low mound and the leaves are leathery. The plant does not like being disturbed, so divide or lift only when really necessary. The plant likes ordinary soil which is well drained and slightly on the dry	4.9

	<p>side. It is an easy care plant. Once established the plant is very tolerant of hot dry spots.</p> <p>Deadhead the flowers to encourage further flower production.</p> <p>It makes a lovely dried flower. To dry, stems should be cut just as the flowers begin to open, and hung upside down in a warm, dark place.</p>	
Limonium perezii 'Deep blue select' seeds - (Sea Lavender, Statice)	<p>This plant produces large clusters of flowers with dark purple-blue calyces and white corollas which are held well above the large rounded mid green leaves, and produce a great show in seaside gardens where they will grow well, coming from the canary islands as they do. They will produce flowers for most of the year and last well in the vase. They will withstand light frosts but should be sheltered from any extreme temperatures.</p>	4.9
Limonium sinuatum 'QIS Apricot Shades' seeds - (Annual statice, Wavy leaf Sea Lavender)	<p>This statice mix produces flowers in shades of apricot and coral. The QIS range has very uniform plant height and flowering time. The flower clusters are approx 7cm and are produced on strong stems .</p>	4.9
Limonium sinuatum 'QIS Dark Blue' - (Annual Statice)	<p>This statice is a nice dark blue, which goes well with most colours . It is an excellent cut flower, as well as performing very well in the garden where it flowers its heart out for the summer.</p>	4.9
Limonium sinuatum 'QIS Pale Blue ' seeds	<p>This pretty pale blue statice is especially good as a cut and also a dried flower. It is a good garden plant as well and the colour goes with most colour schemes.</p>	4.9
Limonium sinuatum 'QIS Rose - (Annual Statice)	<p>This statice produces rose coloured flowers which blend well with most soft colours. The QIS range has very uniform plant height and flowering time. The flower clusters are approx 7cm and are produced on strong stems .</p>	4.9
Limonium sinuatum 'Sunburst White' seeds - (Annual Statice)	<p>This statice produces pure white flowers which mix well with most colours. The QIS range has very uniform plant height and flowering time. The flower clusters are approx 7cm and are produced on strong stems .</p>	4.9
Linaria purpurea 'Canon Went' seeds -(Toadflax)	<p>This lovely old fashioned plant has pretty pink snapdragon shaped flowers on a compact bush with slightly grey green leaves. It is an excellent cut flower. It is usually a short lived perennial, but will gently self seed for you if it likes the position you have found for it. Once it has become established it can withstand some drought. It will bloom for an</p>	4.9

	extended period in cooler temperatures.	
Linaria trinorthophora seeds –(three birds flying)	Linaria triornithophora seeds produce a wonderfully different, fun plant for all of you people who are looking for something a bit different. This plant has purple flowers with bright yellow lips, which are produced in sets of three on a stem. They are for all the world like 3 small colourful birds , perhaps budgies, perching on a stem and discussing world affairs. It is a charming small plant which is long lasting and holds its colour well in the heat of summer. Linaria triornithophora seeds are easy to germinate and the plant makes an excellent cut flower, and will self seed for you , if conditions suit it.	4.90
Linum grandiflorum 'Rubrum' - (Scarlet Flax)	This is a lovely long blooming annual plant which has pretty red flowers which have a silken sheen edged sometimes with black. The flowers are about 3 cm wide and they add an airy light feel to a border. It blends particularly well with other delicate flowering plants such as coreopsis , harebell and gypsophila. It is very easily grown from seed, and likes the soil to be light and a little on the dry side, and is good in xeriscaped gardens .	4.90
Lunaria annua seeds - (Honesty)	These seeds are open pollinated from our garden, where we only have the very attractive white flowered form of the plant, which bears its pretty flowers above mid green foliage. However as the bees are extremely industrious around these plants and love their flowers, it is possible that you may get the occasional purple form as well if the bees have found this in another Honesty lovers garden close by. It is easily grown from seed , grows in partial shade quite well, and provides a pretty display in the garden. But the prime reason for growing this plant is the beautiful mother-of pearl seed cases which make absolutely outstanding decorative floral displays, once the seeds have fallen.	4.9
Lychnis flos-cucculi 'White Robin ' seeds – (Ragged Robin, Cuckoo flower'	This pretty , easy care plant has deep green foliage which forms a mound , and from this mound come the airy graceful flowers with their ragged petals , which stand high above the leaves on dark red stems. It likes soils which are moist such as the banks of streams and ponds, but can also tolerate averagely dry soils, and grows in its natural habitat in moist fields and grasslands. It can tolerate partial shade, and is attractive	4.90

	<p>to bees and butterflies. It makes an excellent cut flower and flowers in its first year from seed.</p> <p>Note that we have increased the amount of seeds in the packet due to the germination rate being lower than expected</p>	
Lysimachia clethroides - (Gooseneck loosestrife)	<p>This is a strong growing plant with very graceful arched white flower stems . It is the recipient of the Award of Garden Merit from the RHS. Florists love its flowers for their pretty shape and lasting ability. It is used to provide a fast spreading cover, and looks spectacular in the wild garden in drifts. and at the edge of streams and in bog gardens It grows well in full sun in moist humus rich soil and can become a weed if not controlled, as it grows quickly by underground stems . To control it grow in dry soil and light shade where it will spread more slowly.</p>	4.9
Lysimachia ephemerum seeds - (Milky Loosestrife)	<p>This useful and ornamental plant should not be confused with the awful weed Purple Loosestrife (Lythrum salicaria)</p> <p>This plant is absolutely non-invasive.</p> <p>This plant forms a clump of greyish green leaves which is quite upright. The white flowers are borne on longish upright spires in summer and late summer, and are attractive to butterflies. It is a very good cut flower, which is used frequently by florists, and can be used to advantage particularly at the back of the border. It can be used to effect beside water, and is reportedly rabbit resistant.</p> <p>Divide clumps in spring.</p>	4.9
Macleaya microcarpa seeds - (Pink plume poppy)	<p>This plant is a large handsome plant which has grey green leaves and dusky pink to buff flowers. It likes full sun but will tolerate partial shade. The flowers are good for cutting and is used in floral arrangements, and bouquets. It is a vigorous grower, so plant somewhere where it can be contained .</p>	4.9
Matthiola fruticulosa 'Alba' seeds- (Perennial Stock)	<p>This plant, which is now hard to find, is a lovely filler for the garden border, requiring no care at all and rewarding each year with a prolific display of scented white flowers. It is particularly nice near an entrance way where its scent will waft indoors. It grows to about 70cm and forms a rounded clump of attractive soft blue grey felted leaves, from which arise, in the second year of growth, wonderful sprays of scented white flowers</p>	4.9

	<p>in spring and summer. It tolerates a moderate degree of drought and also some cold. Deadhead to maintain flowers and vigour. The plant will last for 3-4 years, before becoming woody, by which time you will need to replace it from the odd plants which have self seeded in your garden.</p> <p>\n</p> <p>\nSowing advice</p> <p>\nSurface sow onto the top of well drained seed raising mix or alternatively direct where they are to grow in spring. These seeds need light to germinate. Optimum germination temperature is 15-18 deg C. Keep watered, and plant out when large enough. The seeds usually germinate in 10-14 days.</p>	
Matthiola incana 'Quartet Apricot' seeds - (Annual Stock)	<p>This is an early flowering branching stock variety. It is a wonderful cut flower with all of the style and scent you may wish for. The flowers have pretty apricot petals and they have a wonderful clove scent. Stems are approx 60cm long. Approx 55 % are likely to be double with the rest single to semi double. You can select for doubles by following the sowing advice below. The plant should be pinched to produce a good flower spray form.</p>	4.9
Matthiola incana 'Quartet Lavender' seeds -(Annual Stock)	<p>This is an early flowering branching stock variety. It is a wonderful cut flower with all of the style and scent you may wish for. The flowers have lavender petals and they have a sweet clove scent. Stems are approx 60cm long. Approx 55 % are likely to be double with the rest single to semi double. You can select for doubles by following the sowing advice below. The plant should be pinched to produce a good flower spray form.</p>	4.9
Matthiola incana 'Quartet rainbow' seeds - (Annual Stock)	<p>This is an early flowering branching stock variety. It is a wonderful cut flower with all of the style and scent you may wish for. The flowers have cream yellow centres with a touch of rose on the outer petal edges and they have a wonderful clove scent. Stems are approx 60cm long. Approx 55 % are likely to be double with the rest single to semi double. You can select for doubles by following the sowing advice below. The plant should be pinched to produce a good flower spray form.</p>	4.9
Melanoselinum decipiens seeds – (Madeiran Giant Black Parsley)	<p>Melanoselinum decipiens is a plant from madeira, which grows to a large size and is extremely sought after and handsome . It bears very large sprays of bright pink flowers, and the sprays can be up to 60 cm wide .The stems are bronze tinged when they first sprout , in the second year</p>	

	from seed, and the leaves are finely divided. The plant is very attractive even without the flowers, but altogether the flowers make it a very handsome specimen indeed. The plant may flower in its second year, but it may wait for a few years before it flowers. The plant will die after flowering, but if you leave a flower head to ripen it will self seed for you.	
Miscanthus sinensis 'New hybrids' seeds - (Chinese Silver Grass)	This series has new species crosses among this genus of dense, fine bladed grasses. Colours range from rose to copper and tan with many shades in between. Quite distinct and not found in the usual types which tend to silvery spikes. These grasses can be used for landscaping and also for cutflowers. It makes an excellent container plant in a large container.	4.9
Monarda citriodora x hybrida 'Bergamo' seeds -(Bergamot)	This lovely new annual monarda has very bright rose-purple flowers in corkscrews on a long stem. It is an early flowerer and flowers for a long time. The plants form tight clumps approx 70 cm high . Bergamo doesn't mind the heat and is quite resistant to mildew. It makes an excellent and beautiful cut flower, and looks great in a container as well.	5.1
Nepeta nervosa 'Pink Cat' seeds - (Catmint)	This nepeta won the fleuroselect prize. It has dense aromatic flower spikes of bright pink. It is drought and heat tolerant, and flowers from mid summer for a long time in the garden. It forms bushy mounds of pink flowers and can be grown in containers too. It flowers in the first year from seed, if sown in early spring under cover.	4.9
Nicotiana knightiana seeds - (Tobacco Flower)	A tall graceful annual plant which adds architectural form to your garden. It has small tubular flowers which are like pale apple green velvet. It can be used in a tub or pot as well as in the garden. It is quite hardy, and will grow in sun or light shade so long as it is kept moist. It is a good cut flower and will flower 14 -16 weeks after planting	4.9
Nigella damascena 'Miss Jekyll double Mix' seeds - (Love-in-a-mist)	Nigella damascena 'Miss Jekyll Double mix' seeds is a mix of all of the lovely colours available for Nigella in pinks whites, blues and indigo. the flowers are all double petalled. They make excellent cut flowers, and are easily grown , hardy flowers for the garden. As a bonus all of the seed heads are decorative and can be used for dried flower arrangements.	4.9
Nigella damascena 'Miss Jekyll Light Blue' ' - (Love-in-a-mist)	This nigella. is the pretty light blue flower which everyone associates with Love-in-a-mist. It is an excellent cut flower and the seed pods are great for dried flower arrangements. It makes a very good garden flower, being easy to cultivate and requiring very little care and attention.	4.90

Nigella damascena 'Miss Jekyll Dark Blue' seeds- (Love-in-a-mist)	This is a classic easily grown love-in-a-mist which has pretty blue flowers and purple shaded seed pods which can be used in dried flower arrangements.	4.9
Nigella damascena 'Miss Jekyll Rose' seeds - (Love-in-a-mist)	This pretty easily grown love-in-a-mist has very attractive rose pink flowers and the seed pods are a plum colour making an unusual addition for dried flower arrangements.	4.9
Nigella damascena 'Miss Jekyll White' seeds - (Love-in-a-mist)	This is a lovely classic semi double white love-in-a-mist which everyone loves. They make a great cut flower and will dry well for dried arrangements	4.9
Ocimum basilicum 'Aromatto' seeds - (Basil)	This tall basil was raised for use as a cut flower . It has aromatic leaves, with hints of liquorice and mint, and can be used as foliage or as a cut flower for its brilliant purple flowers. It has attractive purple stems and glossy two toned plum and purple leaves which have purple veins. Its sweet spicy leaves can also be used as a traditional basil in cooking. If you are using it as a cut flower , harvest when the flowers have begun to form and the stems become stiff. Cut in the cool of the evening to prevent the stems from wilting.	4.9
Omphalodes linifolia seeds - (Argentine forget-me-not)	This is a dainty, charming little plant with grey-green leaves. It produces sprays of faintly sweet-scented, pure white flowers with golden eyes (that are excellent for cutting) in great profusion for most of the summer. It will gently self seed, but does not ever become a nuisance. It will tolerate full sun or partial shade, and is also drought tolerant, but prefers a moderately fertile well-drained soil in full sun. Pinch out growing tips to encourage bushier growth. Water infrequently but well. It is best when planted in groups so that the full effect of the fluffy white flowers can be appreciated.	4.9
Orlaya grandiflora 'White Lace' seeds - (Minoan Lace, White Finch ,Lacflower)	Orlaya grandiflora 'White Lace' is a hardy annual which has lovely pure white flowers that form in large, flat-topped clusters which look somewhat like a lace-cap hydrangea's flower. Each small central flower is surrounded by a circle of larger flowers. The flowers are borne in mid summer, and last through to the first frost. They are complemented by the filigree like ferny foliage. They create a lacy effect in the summer border and make an excellent cut flower. White Lace grows to a height of around 60 to 70cm the large flower heads grow to around 8cm across and the flowers complement others in	4.9

	the .	
Oxypetalum coeruleum 'Heavenly Blue' seeds - (Tweedia)	This plant was bred for the cut flower trade but is also a very good garden plant. It has sprays of sky blue flowers, a colour that is rare in the garden. It requires a minimum of 5 deg C to grow. Pinch out the stem when young to encourage a bushy habit. It makes an excellent container plant, and it flowers in the first year from seed, about 4.5 months from germination.	4.9
Papaver orientale-hybrid 'Pizzicato' seeds - (Oriental Poppy)	Pizzicato is a new semi-dwarf strain of oriental poppy. It produces flowers in a mixture of red, scarlet, orange, salmon, mauve, pink and white flowers. Its flowers are produced above lush foliage on strong stems to a height of 50 - 60 cm, and they are strong enough to withstand quite a strong wind. The flowers are large with a diameter of 15 - 20 cm. Pizzicato won the Fleuroselect prize The strong, 50 cm tall stems can even resist heavy winds. It produces up to 20 superb flowers on very uniform plants. It is easily grown from seed. It can also be grown in pots	4.9
Papaver somniferum 'Sunlit Silk mix' seeds - (Poppy)	This is a mixture of all of the wonderful, old fashioned poppies which would have been grown in old cottage and monastery gardens many hundreds of years ago, and indeed were often grown in our grandmothers gardens as well, not so long ago . You will get doubles and a small percentage of singles in pinks , purples, mauves like the one in the picture , burgundy, reds to dark red Black and whites and many colours in between. It is an easily grown plant and one that you really can't go past if you have memories of a garden long ago where there were many abundant flowers, and amongst them , bloomed these lovely ephemeral beauties.	4.9
Papaver somniferum 'Flagship Orange' seeds - (Poppy)	This beautiful poppy, the Owairaka Seeds flagship flower, which we have had for many years, is a brilliant clear sunset orange, the harbinger of warmth to come ,starting its flowering in the lovely clear, cool, early summer mornings and brings the promise of all of the beauty of the New Zealand summer's day, no matter where you may live. It produces many beautiful clear orange blooms which appear in early summer and continue through into summer. Its abundant leaves are a healthy , smooth grey green, and they are slightly different in form from other somniferums, and the plant seems to be a bit more resistant to poppy fungus which attacks some of the other somniferums. There is a	4.9

	<p>possibility that this poppy is a cross between somniferum and another unknown poppy. It is best treated as an annual though has been known to survive Auckland winters.</p> <p>As with all somniferums it produces abundant seed, and left to self seed, you will get a series of flowering plants throughout the summer and on into the late autumn - at least in northern areas of New Zealand.</p> <p>If you are an admirer of poppies, this one is one of the plants that you will love, and must have, and you will not be able to find another poppy which is as beautiful nor as easy care as this one.</p>	
Pasithea coerulea – (Azulio)	<p>This plant has amazing deep blue flowers, with very showy yellow stamens and long pointed grass like leaves. The flowers are about 60 cm tall on strong wiry stems. Pasithea coerulea seeds produce a plant which is an excellent cut flower and lasts well in a vase, as well as being a very pretty garden subject.</p>	9.50
Perovskia atriplicifolia 'Taiga' seeds - (Russian Sage)	<p>This wonderful plant is highly prized for its long flowering ability, flowering from the start of summer right through until the end of autumn. It is the first perovskia of its type, which flowers in the first year from seed. It has heavenly blue flowers in clouds above fragrant grey green leaves. It is a very useful plant which likes a sunny warm spot in the garden, but it can also be used in pots as a specimen plant. It does not need staking.</p>	5.9
Petroselinum crispum 'Hungarian Landrace Parsley' seeds - (Flat-leaf Parsley)	<p>This flat leaf parsley seems to resist some of the diseases which umbellifers succumb to. It is a parsley recommended by our supplier to have a sweet flavour, better than many of the other flat leaf parsleys it was tested against in a taste test, a fine texture and seems to be a vigorous grower.</p>	4.9
Phlomis russeliana seeds - (Jerusalem Sage)	<p>Phlomis Russeliana is a popular plant due to its long flowering season. It produces, at intervals, long stems of soft yellow whorled flowers from late spring into autumn, above lush and dramatic heart shaped green leaves. Each plant forms an architectural candelabra-like effect in the garden, and as a bonus in autumn the flowers turn to handsome seed heads, which add drama to the autumn garden.</p> <p>Although appearing ethereal and tender, this plant is a hardy specimen to about - 15 degrees C. and the beautiful leaf rosettes are evergreen over winter.</p>	4.9

	<p>In addition, Phlomis Russeliana is drought hardy and is an excellent plant for dry partial shade or a dry site in full sun. It tolerates poor, dry soil extremely well.</p> <p>It requires very little maintenance. When the foliage becomes untidy, from late summer onward, it may be cut back to encourage new growth. If left alone some people enjoy the form of this plant, especially during the snow when it appears as white fluffy snow covered balls raised on their stalks. It is a valuable and easy-to-grow plant and attracts bees and other nectar loving insects during its flowering period.</p> <p>To extend flowering, deadhead the spent flowers, this also makes for a tidier-looking plant.</p> <p>Large clumps should be divided every three years in autumn-winter to remove excess growth.</p> <p>Can be planted in a container, but this should be quite a large one , and don't make the soil too rich.</p> <p>The Royal Horticultural Society awarded the prestigious Award of Garden Merit (AGM) to Phlomis russeliana in 1993.</p>	
<p>Phlomis tuberosa 'Bronze Flamingo' seeds - (Jerusalem Sage)</p>	<p>Phlomis tuberosa 'Bronze Flamingo' produces abundant lavender pink hooded flowers, which are borne on dark burgundy stems. The plant lends an architectural quality to the garden and blooms from late spring through summer. It is hardy in most parts of New Zealand, and if you live in an area which gets frost or snow then you will be delighted with the striking sight of hoar frost on the seed heads. The dried seed heads make good additions to a floral arrangement.</p> <p>It likes full sun with well drained fertile soil and medium moisture, but can also tolerate some drought and thus is useful in dry gardens. It is attractive to bees and butterflies. It can be planted in a container, but don't make the soil too rich</p> <p>It was awarded the prestigious RHS 'Award of Garden Merit' in 2012</p>	<p>4.9</p>
<p>Phlox drummondii 'Beauty Series – Phlox of sheep' seeds - (Annual Phlox)</p>	<p>Phlox drummondii ' Beauty series ' is a very pretty mixture of soft salmon, cream, yellow, pink and white . Phlox make very good cut flowers and do well outside in the garden. Phlox drummondii ' Beauty series ' has plants which exhibit smaller bushier forms than the grandiflora variety but have all of the other qualities including having the lovely flower heads which gardeners enjoy. The blooms are softly</p>	<p>4.9</p>

	fragrant.	
Phlox drummondii 'Grandiflora Tapestry mix' seeds	This phlox has a lovely range of coloured flowers from whites creams reds and pinks and purples which are large, with large contrasting eyes of rose to blue. The red and dusky pink are pictured below .	4.9
Phlox drummondii 'Isabellina' seeds	This annual phlox has creamy buttery flowers similar to the throne in picture (This one is Dulce de leche) which work well with all coloured flowers. they make excellent cut flowers and are lovely in the garden as well, having a sweet scent and producing blooms abundantly.	4.9
Phlox drummondii grandiflora 'Brilliant' seeds	This lovely old annual phlox has dense florets of deep rose flowers with a dark centre. It has large flower heads produced abundantly throughout summer. It makes an excellent cut flower and a pretty garden filler.	4.9
Phlox paniculata 'New Hybrids Mixed' seeds - (Perennial Phlox)	The majority of gardeners have always loved border phlox. This delicious perennial can be used for a moist border in sun or partial shade. They make good cut flowers and are attractive to butterflies. The colours are lovely, and the flowers have sweetly fragrant, evening scent which is lovely in the cool of the day, and they are very easy to grow. This new selection has a beautiful, improved colour range of white, salmon, salmon rose and salmon red through to deep rose, purple, violet, burgundy and carmine. Each bud opens in succession, enabling the plant to bloom continually throughout summer. They will flower in the first year, around February if sown in early July.	4.9
Pimelea rosea seeds - (Rose Banjine, Pink Rice Flower)	Note that this is pimelea ferruginea in the picture. Pimelea rosea is similar in form, but the flowers are a lighter pink. This Australian native grows to a small bush eventually, about 1 m high. It has pretty pinkish purple flowers from July to December which are produced profusely on the bush in springtime . It likes light sandy well drained soil in full sun. It makes a good cut flower.	4.9
Platycodon grandiflorus 'Florist Pink' seeds -(Balloon Flower)	This strain has long strong stems and mid pink flowers and was specifically bred for the flower trade. It forms a compact mound of deep green foliage from which arise inflated buds that open into star-shaped single pink blossoms. The plants come up quite late in the spring, and continue blooming from early to late summer. They make a good cut flower. Deadhead them regularly to maintain the flower production, and	4.9

	prune back after flowering to maintain the plant's shape.	
Potentilla nepalensis 'Melton Fire' seeds - (Cinquefoil)	This plant produces large strawberry pink flowers with darker red -pink tonings and creamy inner petals around a darker red eye. It flowers non stop during summer and on into autumn. It is a small well behaved plant which is a valuable filler for the garden. It will also grow well in pots.	4.9
Primula japonica 'Appleblossom' seeds	Primula japonica 'Appleblossom' grows along stream sides in its native Japan. It is pink with a dark eye.	4.90
Primula japonica 'Deluxe Mix' seeds	Primula japonica 'Deluxe Mix' seeds produces candelabra primulas which are a mixture of dark and light pinks and dark reds. Also know as Redfield hybrids. They like moist conditions and don't like lime in the soil.	4.90
Primula japonica 'Millers Crimson' seeds	Primula japonica 'Millers Crimson' seeds produce candelabra type flower stems which have intense red flowers. It likes, cool moist conditions , and grows happily along the sides of streams. It can not tolerate lime in the soil.	4.90
Primula x bulleesiana seeds	This handsome candelabra type primula has red flowers and grows naturally along stream banks in its native South wWestern China. It likes moist situations and will not tolerate lime based soil.	4.90
Primula x pubescens 'Kaleidoscope' seeds	This seed selection has a brilliant coloured mixture of large flowering yellow, velvety-red, blue-lilac, creamy white and bicoloured variations borne over a mound of leathery mid green leaves. It has an award of garden merit from the RHS. The plant likes moist humus rich soil which is well drained and is in part shade.They do not like heat nor can they tolerate humidity. It makes an excellent container plant.	4.9
Prostanthera lasianthos - (Mountain Lilac, Victorian Christmas Bush, Mint Bush)	This is a very attractive bush which grows on the forest margins in Australia. It prefers dappled shade and average moisture in the soil, but can tolerate drought and also frost once it is established. Its long dark green leaves have a distinct and pleasant minty smell and the whole bush is covered with pale lavender coloured flowers in the spring, making an attractive garden specimen.	4.9
Psylliostachys suworowii seeds - (Limonium suworowii, Pink Pokers)	This statice has a very different form from other limoniums. It has long vertical stems of pale pink flowers which are very close together forming a lovely mass of colour. It makes an excellent cut flower. It is a tender perennial , but is usually grown as an annual.	4.9

<p>Puya berteroniana seed</p>	<p>This is a bromeliad which grows in the ground, and is related to pineapple plants . It has grey green leaves which are spiky like the pineapple. It produces lovely turquoise blue flowers from a stalk which can be up to 1.5 m tall. The flowers have central bright orange anthers. The whole flower stalk is very spectacular, and it is of interest in the garden as not only is it beautiful, but it is also rare. It will die down after flowering, but produces other small rosettes of leaves at the base of the plant, which will flower the next year. It does well in rock garden and is also an excellent container plant.</p>	<p>7.75</p>
<p>Rhodanthe chlorocephala ssp rosea 'Pierrot' seeds - (Helipterum roseum, Paper Daisy)</p>	<p>Rhodanthe chlorocephala ssp rosea 'Pierrot' seeds produce a pretty annual plant with pure white flowers which are like paper , and they have an eye-catching centre which has concentric rings of black and bright yellow. They grow to 50 cm, and are excellent for cutting and drying.</p>	<p>4.90</p>
<p>Rhodanthe chlorocephala ssp rosea 'Rose' seeds - (Helipterum roseum, Paper Daisy)</p>	<p>This pretty annual plant has upright everlasting flowers, whose rose pink petals surround pale yellow centres. It makes an excellent cut flower, as well as being striking when grown en-masse as a wild garden meadow.</p>	<p>4.90</p>
<p>Rhodanthe chlorocephala ssp rosea 'White' seeds - (Helipterum, Paper daisy, Everlasting)</p>	<p>This pretty plant has long upright stems of everlasting pure white flowers with a light yellow eye. En- Masse they make an outstanding display as a wild meadow, and they are also an extremely good cut flower , prized for their long lasting qualities and also their excellence for drying.</p>	<p>4.90</p>
<p>Rhodanthe manglesii 'Maculata Rose' seeds - (Everlasting, Paper Daisy)</p>	<p>This everlasting daisy has bright pink flowers which have a ring of red around the golden centres. It is an Australian native which is drought tolerant and makes a great show in the garden. It makes a very good cut flower and can be dried also.</p>	<p>4.9</p>
<p>Rhodanthe chlorocephala ssp rosea 'GoliathTetra Red' seeds - (Helipterum, Paper daisy, Everlasting)</p>	<p>This is a lovely flower for cutting, drying, or just as a splash of colour in the garden. It has very large, double blood red flowers with a prominent black central eye. Its stems are extra strong rising to approx 55 cm .</p>	<p>4.90</p>
<p>Rudbeckia fulgida 'Goldsturm' seeds - (Coneflower)</p>	<p>This plant has wonderful large golden yellow daisy-like flowers borne in profusion . The flowers have black centres and are produced in summer. It is a very good cut flower, having long sturdy stalks. It is easily raised from seed and likes full sun though it will adapt quite happily to partial shade. It likes moist soil which is also well drained, but</p>	<p>4.9</p>

	<p>can tolerate some drought when it is firmly established, however, you will need to mulch it well.</p> <p>Deadhead regularly to extend flowering and encourage further blooms (and if you do not wish the plant to self-seed).It makes an excellent container plant.</p>	
Rudbeckia fulgida var fulgida seeds - (Coneflower, Black-eyed Susan)	<p>This plant flowers for a long time and is a graceful flowerer which is valuable for extending the flowering season. It commences flowering after Rudbeckia fulgida 'Goldsturm', and continues on until the frost arrives. It is an abundant flowerer and makes an excellent cut flower.It makes an excellent container plant. The flowers are somewhat smaller than those of Rudbeckia fulgida 'Goldsturm' and it has a slightly more open form. If you cut spent flowers you will prolong the flowering.</p>	4.9
Rudbeckia hirta 'Cherokee Sunset Mix' seeds - (Gloriosa Daisy)	<p>Rudbeckia hirta, 'Cherokee Sunset' is a fully double mix of large flowered yellow to bronze shades . It is very compact, easy to grow and offers lots of blooms in the heat of summer. It grows all season long and produces masses of flowers from January into March. It is great in containers and in the border, and is a good cut flower.</p> <p>Deadhead regularly to extend flowering and encourage further blooms. Deadhead if you do not wish to self-seed.</p> <p>This is a short lived perennial which is often used as an annual. It prefers a moist well-drained soil in full sun. Do not allow soil to dry out. Mulch if soil is prone to drying out. Once established however it will tolerate some drought if mulched well.</p>	4.9
Rudbeckia hirta 'Prairie Sun' seeds - (Gloriosa daisy)	<p>This is a sturdy first year flowering rudbeckia. It has lovely large, bright yellow flowers which have an inner halo of darker gold, with green button centres. It flowers in the first year and makes an excellent container plant.</p>	4.9
Rudbeckia hirta 'Sahara' seeds	<p>This rudbeckia has a mix of autumn shades and soft pastels.It includes shades of copper, brown, pale yellow, and soft rose. It produces double and semidouble blooms which are approx 8cm wide. The plant is a compact one and is approx 55 cm high. It makes an excellent container plant.</p>	4.9
Rudbeckia hirta "Chimchiminee' seeds	<p>This rudbeckia has a new form. It is an excellent cut flower. The flowers have quilled petals, which give an interesting textural contrast to bouquets. The flowers themselves can be up to 15cm across , can be</p>	4.9

	semi double or single, and come in shades of yellow, gold, mahogany and bronze. they have a black eye , which enhances their beauty. They also add an attractive textural element to large containers and garden beds and attract butterflies and other beneficial pollinators.	
Rudbeckia laciniata seeds - (Black Eyed Susan, Coneflower)	This coneflower is a remarkably hardy , handsome and easy care plant which flourishes at the back of a border, so long as the soil retains moisture well . Can also be used in a large pot as a specimen plant. It has extremely attractive green centred cones from which large, deep gold petals reflex. It flowers from mid summer right through until late autumn when the cold sets in.	4.9
Rudbeckia occidentalis 'Green Wizard' seeds - (Cone Flower)	This plant produces flowers which have black cones above green sepals. The petals which appear on other rudbeckia are almost entirely absent. The black cones are very good for cut flowers , lasting well in water and provide a handsome accent for floral work. It makes an excellent container plant.	4.9
Salpiglossis sinuata 'Superbissima Mix' seeds - (Painted Tongue)	These old fashioned beauties are such lovely annual plants, which have shot velvet colour patterns in their throats. The velvety softness of the petals in these 8cm tubular treasures, creates a depth in the color patterning. The plants make an excellent plant for the garden and they also can be cut making a very unusual cut flower. Colors range from red, violet, yellow and chocolate, to bicolor forms in purples, orange, and blues. This plant likes warmth and well drained soil , with cool nights. It comes from the Andes. Note : Due to a lower germination rate , the number of seeds has been increased in the packet	4.9
Salvia farinacea 'Victoria White' seeds	This recipient of the Award of Garden Merit from the RHS , has white flowers which are produced all summer long. It is a small growing salvia to about 40cm and can be grown in the border or in pots. It flowers the first year from seed , about 4 months from germination if sown in early spring under cover.	4.9
Salvia argentea seeds - (Silver Sage, Artemis)	This plant is a short lived perennial, which is grown for its unusual bright silver leafed foliage, which gradually turns to grey-green as the summer advances. The leaves are quite plump and fuzzy like a lambs ear. It is best placed at the front of the garden where its beautiful tactile foliage can be appreciated. It dies down in winter and comes up again in spring.	4.9

	<p>It is frost hardy to approx minus 20 deg C. If side shoots appear in the second year, they can be removed with some of the root and transplanted to propagate new plants. The plant will usually set some seedlings if left to flower, but usually it will die after flowering. The flowers themselves produce a lovely show and are displayed on 60 - 90cm stems . They are hooded white flowers which are faintly suffused with pink. Some gardeners remove them to keep the plant from spending all its energy, and to try and get it to last longer.</p>	
<p>Salvia nemorosa 'Blue Queen' seeds</p>	<p>This is held by many to be one of the finest salvias. It is a vigorous small form of salvia which forms small bushy clumps. It has intense dark blue branching flower spikes which are produced in early summer, and one plant can appear like a solid block of dark blue , the flower spires are so thick. The plant repeat blooms later in summer and reproduces its fine display.</p> <p>It is a hardy, easily grown plant, and flowers the first year from seed. It can tolerate some drought, grows in spots where other less tolerant plants would complain, and doesn't mind heat.</p> <p>Seed sown from July to early September will produce good sized plants by December that will bloom in the summer of the first year.</p> <p>It is a plant that can fill a bare spot and look good in a very short time. If you grow in groups , it is a show stopper when in flower. It makes an excellent container plant. It flowers in the first year from seed.</p>	<p>4.9</p>
<p>Salvia nemorosa 'Rose Queen' seeds - (Sage)</p>	<p>Salvia 'Rose Queen' is an erect, clump forming hybrid perennial sage that produces many upright, dense flower spikes of hooded, tubular , Mulberry- rose over a long flowering period from summer onwards. It is fibrous rooted, and has an evenly branched form. the foliage is dark green and aromatic. The flowers attract bees and butterflies</p> <p>It looks equally good in pots and the garden.</p> <p>It likes well drained moist soil in full sun, but will tolerate any soil type. Pinch out growing tip when plant is 15cm tall to encourage bushy growth. Keep well watered until established. Fertilise monthly if desired.</p> <p>Remove faded flower spikes to prolong flowering. Deadhead if you do not want it to self-seed. If you wish to collect seed allow the spherical heads to become dry and brown before cutting. Do not remove old stems until new growth appears in spring. Best time to divide perennial Salvias is in</p>	<p>4.9</p>

	early spring prior to new growth emerging.	
Salvia pratensis 'Rose Rhapsody' seeds - (Meadow sage)	Salvia Rose Rhapsody has a rich, densely packed display of long soft pink spikes in summer. It is medium in size, and tolerates both heat and humidity well. Spent flowers should be removed to encourage repeat flowering, so that the plant does not spend its energy on making seeds. It is attractive to butterflies, bees and the foliage is aromatic. The soil should not dry out completely, even though the plant can tolerate drought. In mild areas the plant will stay green over winter, but should be cut back hard in spring to encourage new growth. It makes an excellent container plant. It flowers in the first year from seed and if you plant the seeds under cover in spring, then they will bloom in summer for you..	4.9
Salvia roemeriana 'Arriba' seeds - (Hot trumpets, Prairie Fire, Red Dwarf)	This salvia is ideal for rockeries, front of borders and for containers. It is a shorter growing salvia which likes dryish soil, and so it does well in containers. It can tolerate partial shade and in hotter areas this is a good location for it . It flowers the first year from seed.	4.9
Salvia sclarea var. turkistanica 'Vatican Pink' seeds - (Clary sage)	This is a very beautiful biennial or short lived perennial. It has a rosette of large grey leaves which have a slightly felted appearance and above these are produced the lovely bracted tubular pink flowers. This is a plant which requires very little attention, and grows well and when it is at full flower display it is spectacular. It makes an excellent container plant.It prefers full sun and well drained moist or sandy soil. Butterflies and bees are attracted to it. It is generally disease free , but slugs , caterpillars and snails like the leaves so be prepared for them.	4.9
Salvia sclarea var. turkistanica 'Vatican White' seeds - (Clary sage)	This is a very beautiful biennial or short lived perennial. It has a rosette of large grey leaves which have a slightly felted appearance and above these the lovely white bracted tubular white flowers. This is a plant which requires very little attention, and grows well and when it is at full flower display it is spectacular. It prefers full sun and well drained moist or sandy soil. Butterflies and bees are attracted to it. It is generally disease free , but slugs , caterpillars and snails like the leaves so be prepared for them.	4.9
Salvia splendens hybrid seeds	This plant is larger than the normal dwarf bedding salvia splendens . It grows to approximately 1.3 metres and forms a nice compact bush.	4.9

	<p>Although it is not generally considered to be frost hardy, it survives the few frosts we have in Auckland, growing outside with no protection. It is a magnificent bloomer, producing fiery red blooms all summer long and through the autumn into early winter. It finally gets somewhat straggly in winter especially if the weather has been cold, and it will die back somewhat. In milder northern regions of New Zealand, if given a light haircut in winter it will commence growth in spring and will flower for you when the weather warms. In colder regions it is probably best treated as an annual. It grows easily from seed , and it is one of the steady performers in the garden producing colour throughout the warmer months of the year. It makes an excellent container plant. It flowers in the first year from seed and if you plant the seeds under cover in spring, then they will bloom in summer for you..</p>	
<p>Sarracenia species (alata x flava x leucophylla x purpurea) 'New Hybrids' seeds</p>	<p>These are hybrids of cultivars and their species. (Alata x flava x leucophylla x purpurea). They will have pitcher leaves with variable marking in redbrown to yellow. They will appeal to those of you who have small inquisitive relatives , who are generally fascinated with their carnivorous properties. They make a very attractive foliage plant. They should be grown outside after the first 2 years of their life. They will need a moist place. Acclimatise them gradually to the outside temperatures after frost has gone. They will become dormant when the cold weather arrives. It makes an excellent container plant.</p>	5.9
<p>Saxifraga granulate seeds</p>	<p>This plant is an English wild flower which is often found in old churchyards, meadows and dry banks This plant forms a nice rosette of glossy scalloped leaves which are kidney shaped. In late spring the lovely simple clusters of white flowers emerge . The plant dies down in the summer, and the leaves reappear in Autumn and winter.</p>	4.90
<p>Scabiosa atropurpurea 'Lavender Rose and White mix seeds - (Pincushion flower)</p>	<p>This is a mix of 3 colours : lavender rose and white. The plant makes a wonderful display of flowers in summer attracting bees and butterflies to its nectar filled flowers. It is very easy to grow from seed and is a recommended 'must have' for any garden.</p>	4.9
<p>Scabiosa atropurpurea 'Lavender' seeds - (</p>	<p>This plant has large lavender flowers on long stems , which are excellent cut and also perform well in the garden, blooming constantly right</p>	4.9

Pincushion Flower)	through until autumn. Bees and butterflies love them.	
Scabiosa atropurpurea 'Rose' seeds	This plant has large flower heads which are a pretty rose colour. They are extremely attractive to bees, and make an excellent cut flower. It likes full sun best, but will grow in partial shade.	4.9
Scabiosa atropurpurea 'Fata Morgana' seeds - (Pincushion Flower)	This plant has lovely soft very pale cream pincushion flowers, which are often tinged with pale apricot, on long strong thin stems above a bushy plant which does well in the garden. It makes a lovely soft addition to bouquets adding an old world look, and performs well in the garden also.	4.9
Scabiosa atropurpurea 'Picotee Pincushion Mix' -(Pincushion flower)	This is a completely new and different scabiosa. It is fresh from the experimental beds of this well known US breeder. You will get a mixture of flowers in dark red, black, garnet, raspberry, lavender, and red which will have lacy white fringes adorning the petals. If you are very lucky you may get flowers with pink fringes in these colours, and some rare examples of lavender flowers with raspberry picotee, and white with red picotee. These are exceptionally beautiful and completely new. Because these seeds are the first in this experimental range, you will almost surely get plants with flowers which have no picotee edges at all and are solid colours. But that's the joy of growing flowers, especially when there's a chance that you may get something unique and beautiful!	4.9
Scabiosa atropurpurea 'Snow Maiden' seeds - (Pincushion flower)	This scabiosa has long stemmed pure white flowers which make an excellent cut flower, is easy to grow, and the bees and butterflies love it.	4.9
Scabiosa ochroleuca seeds - (Pincushion Flower)	This charming scabiosa has pretty pale lemon yellow long stemmed flowers which are produced non stop from December through into autumn. The plant is undemanding and needs little care, and the flowers are attractive to beneficial insects. They are excellent cut.	4.9
Scabiosa stellata seeds	This plant has lilac flowers in clusters. The seed pod forms a golf ball sized structure on slender stems which matures to a golden caramel colour with very attractive radial markings. This is used as a cut flower in floral and dried flower work.	4.9
Schizanthus pinnatus 'Dante's Roses seeds - (Butterfly Wings Poor Man's Orchid)	This annual plant has delicate flowers with rose red hearts and lighter pink wings. It makes a good cut flower which despite its delicate appearance lasts well in water, and the plant is great for the garden as well producing a mass of flowers on the one small bush. It likes cooler	4.9

	temperatures , so if you live in the north , give the plants some dappled shade particularly in the summer. If they get too hot they will cease flowering.	
Sedum telephium 'Emperor's Waves' seeds	Sedum 'Emperor's Waves' provides a welcome splash of colour in late summer and autumn. It has flower heads made up of masses of tiny star shaped purple-red pink flowers, and these stand above the succulent blue green foliage. The stems are dark purplish red. It prefers well-drained soil, and likes full sun or a lightly shaded spot. It will also do well in containers filled with good quality compost. It is a great little plant, being hardy and drought resistant.	4.9
Sidalcea malviflora 'Stark's hybrids' seeds - (Prairie Mallow)	This lovely plant is like a fairy hollyhock , with its beautiful, delicate flowers on strong stems up to about 1 metre. It forms a bushy basal plant and the flowers are produced on multiple stems . This mixture has shades of pink, and sometimes a white as well. It makes an excellent and long lasting cut flower , and deserves to be better known.	4.9
Silene asterias seeds - (Catchfly)	This is a hardy and unusual perennial and rarely available. It has strong upright stems which begin to flower in late Spring. The flowers are borne in round clusters about 6cm wide which consist of small deep burgundy blooms which are held in dark red bracts. The bracts have very bright blue anthers, and together the mixture is very striking. The leaves themselves are attractive even when the plant is not in bloom, as they are bright spring green . It likes an organic soil which has good moisture retention in full sun . If the soil does not retain moisture well then put it in partial shade and mulch well. However the soil should not be waterlogged. It makes a good cut flower and is deciduous.	4.9
Stachys byzantina seeds	This plant has velvet textured grey leaves, which everyone wants to touch. It forms a thick matt of striking coloured grey ground cover , which grows in full sun. It can also withstand soil which is lean. The flowers are purple , but not particularly prized, it is the leaves which no-one can resist.	4.90
Stachys officinalis- (Betony, Bishopwort)	This plant has pretty pink flowers on upright stems , and it looks good in the cottage garden when planted in clumps . It has been used medicinally for many centuries for a number of maladies, but today is chiefly used for its flowering potential . It is a good cut flower.	4.9

<p>Symphandra zanzegur - (Ring Flower, Bell Flower)</p>	<p>This lovely campanula is quite rare. It has light green leaves which are rather like a geraniums, and the pretty nodding heads of pale blue bells are produced in profusion. They have thin wiry stems which are a dull red . They like partially shaded areas in dryish well drained soil. It makes a good cut flower and grows well in pots.</p>	<p>4.9</p>
<p>Tagetes lucida 'Perigon' seeds - (Sweet Scented marigold, Mexican tarragon)</p>	<p>This attractive plant grows into a small bush about 1 m tall eventually. Its leaves have a tarragon scent and are a glossy green. It is traditionally used for making tea and also for seasoning, but the small bright yellow flowers which are produced abundantly can also be used as a fragrant cut flower, and used for dye. It attracts birds and butterflies.</p>	<p>5.1</p>
<p>Tanacetum parthenium 'Magic Lime Green' seeds - (Matricaria)</p>	<p>This matricaria has unusual lime green to yellow 2cm flowers on long strong stems . It flowers prolifically, is easy to grow and care for and is a great cut flower , but also performs well in the garden</p>	<p>5.90</p>
<p>Tanacetum niveum Jackpot' seeds</p>	<p>This plant has myriads of dainty small white daisy flowers with yellow centres appearing over pretty silvery coloured foliage. This is a plant which can be used effectively to soften plantings in the border. It forms a small well branched bush, and likes well drained, tending to dry soil. It flowers in its first year and looks great in pots where it does well .</p>	<p>4.90</p>
<p>Tanacetum parthenium 'Sunny Ball' seeds</p>	<p>Tanacetum Parthenium ' Sunny Ball' seeds produce a plant that has glowing yellow /gold flowers on a bushy plant with strong stems . It flowers prolifically, is easy to grow and care for and is a great cut flower , but also performs well in the garden.</p>	<p>5.90</p>
<p>Thalictrum aquilegifolium seeds - (French Meadow Rue)</p>	<p>Thalictrum aquilegifolium is a very beautiful perennial. It has a basal mound of fine lacy bluish- green foliage that appears similar to an aquilegia. The flower stems which are produced in late spring and early summer are topped with large panicles of lavender -pink to white fuzzy flowers. Thalictrum is tolerant of warm humid summers, and prefer a rich soil which is moist. It enjoys dappled sun, but is fairly tolerant and will take partial shade. If it is kept moist it will tolerate full sun. It is an easy care plant, and if the seed is sown early enough in the season it will flower in the same year. Thalictrum aquilegifolium produces flower stems that rise above the</p>	<p>4.9</p>

	<p>foliage in late spring to early summer and are topped by a hazy, fuzzy show of purple flowers.</p> <p>Despite their delicate appearance, Thalictrum is fairly tolerant of warm, humid summers.</p> <p>They prefer a rich, humus rich soil on the moist side and dappled to partial shade, but will grow reasonably well in most borders if the soil is moisture retentive. In warm regions plants will tolerate full sun if kept moist. Clumps may be easily divided in spring when growth commences, and it is wise to divide it every 2-3 years to renew its strength. In midsummer, they add a lovely, gentle effect when combined with larger flowered plants and provide an excellent contrast to more architectural plants. They produce a shimmering hazy effect in beds and borders, and both leaves and flowers are good for flower arrangements.</p>	
<p>Thalictrum delavayi album seeds - (Meadow Rue)</p>	<p>These are open pollinated seeds of the very beautiful white variety of Thalictrum delavayi . It produces small hovering shiny white flowers which shimmer like tiny parasols amongst delicate maiden-hair-fern like leaves. It flowers on into autumn. Its leaves are somewhat paler than the other Delavayi varieties. It is a beautiful addition to the summer border. Foliage of plants that are under stress can turn completely purple, and sometimes plants which are grown in pots assume a purple tinge to their leaves.</p> <p>It is a member of the buttercup family and grows high on hillsides in scrub in the North western Yunnan province of China, in ground that is often stony and acidic.</p> <p>In gardens the plant seems to adapt well to a range of conditions, from full sun to dappled shade, in any reasonably well drained soil, and does not like to be waterlogged. Try to protect it from winds by placing it next to a protecting plant on the windward side, so that you dont have to stake it, as its airiness is spoilt by staking. It is a very useful and pretty garden plant which does not seem to take very much care and increases a little in size year on year.</p>	<p>4.9</p>
<p>Thalictrum delavayi seeds- (Meadow Rue)</p>	<p>Thalictrum delavayi has beautiful, fine feathery foliage similar to a small aquilegia leaf , or perhaps a maidenhair fern leaf. Its clusters of mauve flowers are borne in panicles aloft on purple tinged stems in an airy spray of misty lilac mauve.</p>	<p>4.3</p>

	<p>Cut down stems as soon as flowering has completed. Divide the plant every 2-3 years as soon as growth begins in spring, in order to maintain its strength. Large divisions can be replanted outside, smaller ones overwintered in a greenhouse for planting out the following spring.</p> <p>Thalictrum are native to stream banks, shaded mountains, and moist meadows throughout most of the globe and thus they like dappled shade and moisture retentive soil, which is not waterlogged however. Most Thalictrum are late to emerge in mid to late spring, so take care not to disturb their crowns.</p>	
Trachymene caeruleum 'Lacy White' - (Didiscus)	This is a lovely white flower with nice large lacy flowers. It is a very good cut flower and lends a light airy texture to any garden border.	4.9
Trachymene coerulea 'Lacy Blue' seeds - (Didiscus, Lace flower)	This is a pretty frothy lacy blue flower which makes an excellent cut flower, which gives a delicate appearance to bouquets. The 6cm flowers are held on straight stiff stems, and they have a mild, clean fragrance. The plant is well branched and grows upright. It has few leaves. This plant is well worth having in the garden as it produces blooms for up to two months.	4.9
Trachymene coerulea 'Lacy Pink' seeds- (Didiscus, Lace flower)	This is a pretty frothy lacy pink flower which makes an excellent cut flower, which gives a delicate appearance to bouquets. The 6cm flowers are held on straight stiff stems, and they have a mild, clean fragrance. The plant is well branched and grows upright. It has few leaves. This plant is well worth having in the garden as it produces blooms for up to two months.	4.9
Tropaeolum minus 'Baby Deep Rose' seeds - (Nasturtium)	This plant grows to about 30 cm high and forms a bushy plant about 40cm wide. It has unusual deep rose pink coloured flowers. It is easy to grow, and looks good in containers or in the garden.	4.9
Tropaeolum minus 'Tom Thumb Mix' seeds - (NasturtiumP)	This mix has small compact plants with bright single flowers in an excellent colour range. They make good plants for beds and containers. Both flowers and leaves are edible and can be used in salads	4.9
Tulipa sprengeri seeds	This tulip is native to Turkey and Asia minor. It has buff/bronze buds, and the flower which emerges from these is a brilliant red, goblet-shaped marvel. The stem is about 40cm long. It is one of the last tulips to flower. It will self seed in the garden over time and can be used to naturalise in the garden amongst shrubs and also in grass, where, it will eventually over time, form colonies of brilliant red	4.9

	<p>carpet . It makes an excellent container plant. It has been awarded the Award of garden Merit by the RHS.</p>	
<p>Verbascum chaixii 'Sixteen Candles' seeds - (Nettle-Leaved Mullein)</p>	<p>Verbascum chaixii, 'Sixteen Candles' has handsome leafy rosettes and from these come many -branched flower heads consisting of hundreds of bright yellow flowers, each one of which has violet-coloured stamens. It is an easily grown and statuesque plant.prefers well drained soil, and dislikes wet heavy soils. It tolerates frost and drought once established, but during winter protect with mulch. 'Sixteen Candles' provides a good supply of food to honey-bees, and it will self seed. The plant prefers full sun.To encourage repeat blooming remove the central flower stalk after initial flowering. Cut just above where the side shoots are forming with a sharp knife.</p>	4.9
<p>Verbascum chaixii var. album 'Wedding Candles' seeds - (Mullein)</p>	<p>This Verbascum has pure white flowers with dark purple centres. Its flower stems are multi branched. It has neat basal rosettes of mid green leaves. The plant prefers well drained soil, and dislikes wet heavy soils. It tolerates frost and drought once established. 'Wedding Candles' provides a good supply of food to honey-bees, and it will self seed. During winter protect with mulch. To encourage repeat blooming remove the central flower stalk after initial flowering. Cut just above where the side shoots are forming with a sharp knife. This plant won a Royal Horticultural Society award of merit.</p>	4.9
<p>Verbascum olympicum var album - (White Mullein)</p>	<p>This is a handsome plant to add architecture to a garden , having long white or cream spikes of flowers which can light up a dull garden especially if displayed against a dark background. It makes an imposing and stately plant for the garden and will fit in well with any colour scheme. It likes a dry spot in the garden and can be used as a pretty pot plant.</p>	4.9
<p>Verbascum phoeniceum 'Mixed Colours' seeds - (Mullein, Roman Candles)</p>	<p>This mix has a colour range of violet, red, pink and white . It blooms reliably and has lovely flowers held on thin airy graceful spires. It can be somewhat short lived (2 - 4 years) but will self seed readily for you. The small plants can be easily transplanted. If you deadhead the flowers it will re-bloom for you. Grow this plant in well drained soils which are not too rich in compost. It is drought tolerant and will self seed in the garden.</p>	4.9

	It likes the soil to be a little dry . It makes a good container plant. It flowers in the first year from seed, about 6 months from germination, if sown under cover in early spring.	
Verbena bonariensis seeds	This verbena has clusters of purple flowers borne on long graceful stems. It blooms from early summer to the frost in autumn and grows best in full sun or light shade. It looks good in mixed borders and works well with most plantings. It is very attractive to butterflies and bees. It flowers in summer of the first year from seed if started in early spring under cover.It makes a good cut flower, and can be dried for dried floral arrangements.	4.9
Verbena hastata 'Pink Spires' seeds- (Pink Vervain)	<p>Verbena hastata is a different plant from most commonly seen Verbena. It is hardy through most winters , and if it is sited in a sunny well drained spot its sheer volume of flowers make it a real winner. It is becoming very popular.</p> <p>Verbena hastata 'Pink Spires' produces stems of flowers which branch like large candles on an 18th century dinner table with lovely pink flowers which are produced in volume at the tips of the stems.</p> <p>The flowers come in mid summer and bloom through into late autumn. Grow plants together in groups for the best effect. Pinch back when first planted to encourage branching. Water deeply to encourage root growth. nlf the seed is sown early it will flower in the same year. Cut flowers regularly to encourage growth and to prolong flowering . Deadhead if you do not want it to self-seed, and there will be another flush in autumn if you have deadheaded. Cut back old growth in spring once new shoots emerge at the base.</p> <p>This plant is easily grown in average, to medium, moist soils in full sun. It is a hardy plant and does not need staking, and gives an abundance of mid to late summer colour in the garden. The plants can also be used to advantage in a container.</p>	4.9
Verbena hastata 'White Spires' seeds -(White Vervain)	<p>Verbena hastata is a different plant from most commonly seen Verbena. It is hardy through most winters , and if it is sited in a sunny well drained spot its sheer volume of flowers make it a real winner. It is becoming very popular.</p> <p>Verbena hastata 'White Spires' produces candelabra-like stems of lovely white flowers which are produced in volume at the tips of the stems.</p>	4.9

	<p>The flowers come in mid summer and bloom through into late autumn. Grow plants together in groups for the best effect. Pinch back when first planted to encourage branching. Water deeply to encourage root growth. If the seed is sown early it will flower in the same year. Cut flowers regularly to encourage growth and to prolong flowering . It is a hardy plant and does not need staking, and gives an abundance of mid to late summer colour in the garden. The plants can also be used to advantage in a container.</p>	
<p>Veronica gentianoides 'Ramona' seeds -(Veronica)</p>	<p>This plant forms a low rosette of wide leaves with straight stems of ice blue, veined flowers which are produced over a long period from late spring and throughout summer. It has a compact habit which allows it to be used in tubs , pots and the front of the border. It makes a good cut</p>	<p>4.9</p>

	<p>flower.</p> <p>Cut back any spent flowers to encourage more flowers and also good growth the following year. Ensure that you water regularly during dry spells, and to give the plant a bit of pep , add extra phosphorus to encourage root development.</p> <p>The plant likes full sun but can also tolerate partial shade, and likes rich, moist, well drained soil but will tolerate any soil which is not too dry, in full sun or partial shade .</p> <p>When top growth is killed by frost, cut stems back to 3-5cm above the soil line.</p> <p>Veronica gentianoides is easily divided in fall or early spring, and is evergreen in mild winter regions. It can be propagated by seed or by division of congested clumps every 3 years.</p>	
<p>Veronica longifolia 'Alba' seeds - (Speedwell)</p>	<p>Veronica longifolia, 'Alba' forms a bushy, upright plant of shiny green leaves . The vigorous vertical stems hold tall, slender white spires which have with masses of densely grouped, small buds, the flowers open, one after the other, from the base to form a long-lasting spire.</p> <p>Veronica longifolia prefers a position in sun or part shade in moist well-drained soil, however it will tolerate drier soils, so long as it is mulched. It flowers in midsummer and lasts for several months into autumn. It adds a gentle columnar, architectural height to the border and is an excellent contrast to more traditional flower shapes when grown at the front of the border. It is eye-catching when planted in drifts.</p> <p>It is attractive to bees, and butterflies and makes a good cut flower.</p>	4.3
<p>Veronica spicata 'Sightseeing' seeds - (Speedwell, Bird's eye)</p>	<p>This is a mix of white pink and blue flowered plants, with extra long flowers which make great long lasting cut flowers and are attractive to beneficial insects. It is an excellent garden flower as well , making an attractive display. It makes an excellent container plant.</p>	4.9
<p>Veronicastrum virginicum f. albiflorum - (Culvers root, Black root) seeds</p>	<p>This plant has long handsome spires of white or very rarely pale blue flowers. The flowers are quite like those of a blue veronica in form. They are dramatic when plants are fully in flower in mid summer. They can grow to approximately 175 cm and like a moist soil. It is an easy and adaptable plant requiring little care when established.</p> <p>It will grow in full sun to part shade in most soils. It does not spread very far and stays in a compact mound , and does not require staking</p>	4.9

Viola hybrida 'Amber jewel Mix seeds	This is a mix of very pretty and unusual colours : velvet brown , amber , raspberry liqueur, plum cognac, and copper shades, as well as a few deep purple and other shades. The flowers are fragrant and make good container plants as well as being ideal for small posies and they flower prolifically for you in the garden.	4.90
Viola wittrockiana 'Brunig 'seeds	Viola 'Brunig' seeds have very dark velvety black petals which have a very bright yellow picotee edge to them. It makes a very unusual and striking small plant for the front of the border and looks good in containers too.. The flowers can be used for small posies, as it has short but hardy stems.	4.90
Viola wittrockiana 'Nature Antique Shades' seeds - (Pansy)	This viola has rose coloured flowers which fade at first to a warm cloudy peach and then to a light salmon apricot and looks for all the world as if it is a colour coordinated mix of several violas. It is an excellent container plant. It makes a great flower for posies and table decorations. It flowers in the first year from seed.	5.60
Xeranthemum annuum 'Mixed colours' seeds - (Strawflower)	This plant has everlasting flowers in colours of yellow pinks purples and whites. They make wonderful dried flowers and are good cut fresh as well as making a good display in the flower garden	4.9
Zinnia elegans 'Benary Giant Bright Pink' seeds	The 'Benary Giant' strain is the premium zinnia. It is recommended by the Association of Specialty Cut Flower Growers. These plants are vigorous all-season producers which hold hold up well in summer rain and heat. The blooms are densely petaled and can reach up to 15 cm across. They are very long lasting cut flowers in bouquets. This zinnia has beautiful bright pink flowers.	4.9
Zinnia elegans 'Benary Giant Deep Red' seeds	The 'Benary Giant' strain is the premium zinnia. It is recommended by the Association of Specialty Cut Flower Growers. These plants are vigorous all-season producers which hold hold up well in summer rain and heat. the blooms are densely petaled and can reach up to 15 cm across. They are very long lasting cut flowers in bouquets. This zinnia has beautiful deep red flowers.	4.9
Zinnia elegans 'Benary Giant Mixed' seeds	This is the premium zinnia. It is recommended by the Association of Specialty Cut Flower Growers. These plants are vigorous all-season producers which hold hold up well in summer rain and heat. the blooms	4.9

	are densely petaled and can reach up to 15 cm across. They are very long lasting cut flowers in bouquets. Colors include: deep red, orange, carmine rose, coral, wine, purple, bright pink, white, salmon rose, scarlet, and golden yellow.	
Zinnia elegans 'Benary Giant 'Purple' seeds	The 'Benary Giant' strain is the premium zinnia. It is recommended by the Association of Specialty Cut Flower Growers. These plants are vigorous all-season producers which hold hold up well in summer rain and heat. The blooms are densely petaled and can reach up to 15 cm across. They are very long lasting cut flowers in bouquets. This zinnia has beautiful purple coloured flowers.	4.90
Zinnia elegans 'Benary Giant Salmon Rose' seeds	The 'Benary Giant' strain is the premium zinnia. It is recommended by the Association of Specialty Cut Flower Growers. These plants are vigorous all-season producers which hold hold up well in summer rain and heat. The blooms are densely petaled and can reach up to 15 cm across. They are very long lasting cut flowers in bouquets. This zinnia has beautiful salmon rose coloured flowers.	4.9
Zinnia elegans 'Benary Giant White' seeds	The 'Benary Giant' strain is the premium zinnia. It is recommended by the Association of Specialty Cut Flower Growers. These plants are vigorous all-season producers which hold hold up well in summer rain and heat. The blooms are densely petaled and can reach up to 15 cm across. They are very long lasting cut flowers in bouquets. This zinnia has beautiful white coloured flowers.	4.90
Zinnia elegans 'Benary Giant 'Wine' seeds	The 'Benary Giant' strain is the premium zinnia. It is recommended by the Association of Specialty Cut Flower Growers. These plants are vigorous all-season producers which hold hold up well in summer rain and heat. The blooms are densely petaled and can reach up to 15 cm across. They are very long lasting cut flowers in bouquets. This zinnia has beautiful wine coloured flowers.	4.90
Zinnia elegans 'Candy Mix' seeds	This zinnia has very beautiful flowers which are like a scabious or pincushion flower. The mixture has bright colours which includes pinks reds and oranges. It makes an excellent cut flower and will attract bees and butterflies.	4.9
Zinnia elegans 'Giant Cactus mix' seeds	This mix has a choice blend of warm-toned blooms, each boasting masses of long, needle-thin petals with fascinating texture and long-lasting colour. As easy to grow as the more familiar Dahlia-flowered	4.5

	<p>Zinnia.</p> <p>The blooms are fully double and stretch 10 to 12 cm across. Yet despite their massive size, they won't flop -- the long, strong stems are especially sturdy, keeping these blooms turned toward the sun in the garden or as cut flowers. There are many shades of colours in this mix of yellow, orange, red, rose, pink, salmon, and white.</p> <p>These plants reach 75cm tall and 30 cms wide, and begin flowering as soon as the summer weather arrives. They thrive in the blazing heat, asking only well-drained soil and adequate water to keep them colorful for months.</p> <p>Zinnias are one of the easiest annuals to grow, and attract butterflies to the garden. They are outstanding in beds, borders, and containers, and are the perfect cut flower--the more you cut, the more you get! They thrive in the sun and heat of summer, and ask only well-drained soil.</p>	
Zinnia elegans 'Gigantica Primrose'	This is a very large double flowered pale primrose yellow zinnia . It is an excellent cut flower , is very easy to grow from seed and performs well in the garden where its large showy flowers go well with most colour schemes	4.9
Zinnia elegans 'Gigantica White'	This is a very large double flowered pure white flowered zinnia . It is an excellent cut flower , is very easy to grow from seed and performs well in the garden where its large showy flowers go well with most colour schemes	4.9
Zinnia Gigantica 'Cherry 'seeds	This zinnia has very large double cherry red flowers. It makes an excellent cut flower and looks great in the garden. If you plant it in groups , they will make a lovely solid mass of cheerful colour.	4.90
Zinnia Gigantica 'Golden Yellow' seeds	This zinnia has very large double golden yellow flowers. It makes an excellent cut flower and looks great in the garden. If you plant it in groups , they will make a lovely solid mass of cheerful colour.	4.90
Zinnia Gigantica 'Lavender 'seeds	This zinnia has very large double lavender flowers. It makes an excellent cut flower and looks great in the garden. If you plant it in groups , they will make a lovely solid mass of cheerful colour.	4.90

	cut flower and looks great in the garden. If you plant it in groups , they will make a lovely solid mass of cheerful colour.	
Zinnia elegans 'Inca' seeds	Zinnia Inca has bright orange,fully double cactus flowers. The large flowers are 12 cm across, and twist and curl inwards catching the sun. The plant grows to approx 1 metre tall and forms a robust bushy plant. It is an excellent flower as a cut flower and also as a reliable and eye catching garden flower	4.5
Zinnia elegans 'Jim Baggetts Choice Mix' seeds	This wonderful kaleidoscope of brilliantly coloured and diversely formed zinnias come from the well known Oregon State vegetable breeder Jim Baggett, who bred zinnias as a sideline. These zinnias have huge heads on long stems in amazing extremes of whites, pale and hot pinks, magentas and purples, reds, oranges, and yellows with long petals which are sometimes rolled or quilled . They are nothing short of spectacular for a person who loves zinnias.	4.9
Zinnia elegans 'Magic Bus' seeds	This new zinnia introduction is a selected cross between 'Jim Baggetts Choice mix' biggest orange zinnia balls with Zinnia 'Zowie'. The cross produces a 'Magic Bus' of brilliant colour intensities and unusual shapes and sizes. The supplier reports that this is a very diverse group of plant statures, degrees of doubleness, and color patterns and blends. Most of these will make good cut flowers. The magenta and neon red colors of zinnia 'Zowie' blend with Jim Baggett's big orange in the most unexpected ways, creating tri-toned pompoms, neon hued flowers and wonderful bright streaks of color. This zinnia is for those of you who like to grow unusual and different plants.	4.9
Zinnia elegans 'OK magic Mix'	It is a cross between Oklahoma 'Ivory' and zinnia 'Magic Bus'. The Oklahoma zinnias give their beautiful full medium flower head which is an excellent cut flower , and the Magic Bus series gives its amazing rich colour range. You will get a mix of lovely colours and textures , and because the Oklahoma zinnia range has some mildew resistance, you should get increased sturdiness as well	4.9
Zinnia elegans 'Oklahoma Ivory' seeds	These are lovely flowers in soft ivory tones. They are mostly double but there will be some semi double flowers . They are one of the best zinnias for powdery mildew resistance. They have long strong stems and the flowers are about 7cm wide. They perform magnificently in the garden lasting through late summer into autumn (later in the North) and	4.9

	are an excellent cut flower.	
Zinnia elegans 'Oklahoma Mix' seeds	This is a mixture of all of the highly mildew resistant Oklahoma series zinnias. These are tall vigorous and healthy, and produce great cut flowers which have a long vase life. They also make a magnificent garden display, lasting into early winter (for the northern part of the North Island).The flowers are approx 7cm rounded, mostly fully double blooms in magenta, red, yellow, pink , salmon and white on long strong stems and they are very easy to grow. Highly recommended.	4.9
Zinnia elegans 'Peppermint stick' seeds	This Zinnia has flowers in lovely soft shades which can range through cream, pale pink, gold and white and each flower is striped and flecked with red ,as if flicked from a painters brush. It is a fun zinnia and no two flowers are completely alike , though they make good subjects for a bouquet as they seem to blend in with most colour schemes. These plants reach 60-70 cm tall and 30 cms wide, and begin flowering as soon as the summer weather arrives. They thrive in the blazing heat, asking only well-drained soil and adequate water to keep them dazzling for months.	4.9
Zinnia elegans 'Queeny Lime Red' seeds	This Zinnia has flowers which are very unusual and beautiful. The outer petals of the fully double flowers are pale red fading to lime green towards the centre of the bloom and with a deep maroon centre. It is an annual , and is as easy to grow as the more familiar Dahlia-flowered Zinnia. These plants reach 75cm tall and 30 cms wide, and begin flowering as soon as the summer weather arrives. They thrive in the blazing heat, asking only well-drained soil and adequate water to keep them dazzling for months. Zinnias are one of the easiest annuals to grow, and attract butterflies to the garden. They are outstanding in beds, borders, and containers, and are the perfect cut flower--the more you cut, the more you get! They thrive in the sun and heat of summer, and ask only well-drained soil.	5.4
Zinnia elegans 'Queeny Mix' seeds	This Zinnia has very attractive and unusual chocolate peach brown coloured blooms which are large and are held above the foliage on good strong stems. As the flowers age they change to lime green. This provides a display of two colours on the one bush which is unusual and very attractive. They are loved by butterflies and bees	5.4

	<p>Sowing advice Sow outdoors in spring and summer when the soil is warming up. Sow indoors Sep-Oct. For best results sow zinnia where they are to flower (they like a sunny, sheltered position and don't like to be moved), but they can also be sown indoors in cell pots. Outdoors: Sow 3mm deep in drills 30cm apart into well prepared soil that has been raked to a fine tilth. Water regularly. Germination takes 7-14 days. Indoors: Sow into seed raising mix at temp. 15-25°C. Cover with 3mm soil. When large enough to handle transplant and grow on in cooler conditions. Acclimatise 10-15 days and plant out after danger of frost has passed.</p>	
Zinnia elegans 'Scarlet Flame' seeds	This is a lovely old variety which has handsome double and semi double 12-14 cm scarlet-red flowers on long straight stems which are ideal for cutting. It blooms well and the blooms last for a long time. it has stood the test of time and is still an excellent cut flower and garden subject	4.9
Zinnia elegans 'Zinderella Peach' seeds	These zinnias have very attractive peach orange blooms with cream and rose detailing which gives the flowers a peach colouring, with each producing a strong central crest. They are an excellent cut flower and will Add height and interest to the middle of the border, and will bloom right through summer for you.	5.4
Zinnia haageana 'Aztec Burgundy Bicolour' seeds	This is a short, compact zinnia species. It is normally 25-40 cm tall. It produces flowers abundantly and is also more mildew resistant than other zinnia species. 'Aztec Burgundy Bicolour' is a new colour range . The flowers are fully double burgundy coloured and are tipped in cream . They are prolific producers , flowering from early summer until the first frosts	4.9
